Table Finding Guide—Subjects by Type of Area and Table Number

This guide lists all subjects covered in this report but does not indicate cross-classifications (e.g., by tenure). Data on allocation rates appear in tables A-1 and A-2. For meanings of abbreviations, see the Introduction. For a description of area classifications, see appendix A. For definitions and explanations of subject characteristics, see appendix B.

HOUSING DIVISION Arthur F. Young, Chief

Acknowledgments

Many persons participated in the diverse activities of the 1980 census. These acknowledgments generally reflect staff during the census-taking process. The Bureau was guided by then Director, Vincent P. Barabba and then Deputy Director, Daniel B. Levine. Primary direction of the census program was performed by George E. Hall, then Associate Director for Demographic Fields, assisted by Earle J. Gerson, then Assistant Director for Demographic Censuses, in conjunction with Barbara A. Bailar, Associate Director for Statistical Standards and Methodology, Howard N. Hamilton, Assistant Director for Computer Services, Shirley Kallek, Associate Director for Economic Fields, James D. Lincoln, Associate Director for Administration, Rex L. Pullin, then Associate Director for Field Operations, and W. Bruce Ramsay, then Associate Director for Information Technology, The director's staff was assisted by Peter A. Bounpane and Sherry L. Courtland.

This report was written in the Housing Division under the supervision of Arthur F. Young, Chief, and Leonard J. Norry, Assistant Chief, by William A. Downs, Chief, Decennial Planning and Data Services Branch, assisted by Sherry A. Briscoe and Higinio Feliciano.

Responsibility for the overall planning, coordinating, and processing of the 1980 census was in the Decennial Census Division under the direction of Gerald J. Post, then Acting Chief, assisted by Marie G. Argana, Rachel F. Brown, Donald R. Dalzell, H. Ray Dennis, Leonard Goldberg, Morris Gorinson, Earle B. Knapp, Jr., and Roger O. Lepage. The Outlying Areas Branch was under the direction of Carmina Fernández Young, then Chief, assisted by Irma F. Harahush and Angel M. Landrón.

Data base and generalized system support was developed and provided by Systems Development Division, Judy M. Bedell, then Chief, under the direction of John Jerry Bell, then Assistant Chief.

Computer processing was performed in the Computer Operations Division, C. Thomas DiNenna, then Chief, and John E. Halterman, then Assistant Chief.

The Statistical Methods Division was largely responsible for developing new procedures to obtain a more accurate count of the population. This work was supervised by Charles D. Jones, Chief, David V. Bateman, then Assistant Chief, Susan M. Miskura, and Robert T. O'Reagan, Assistant Chiefs.

Geographic programs and plans were developed in the Geography Division under the direction of Gerald E. Cranford, then Assistant Chief, Robert W. Marx, Silla G. Tomasi, Assistant Chiefs, and Donald I. Hirschfeld, Special Assistant, Joseph J. Knott coordinated geographic operational phases.

Data collection activities were supervised in the Field Division by Richard C. Burt, then Chief, under the direction of Lawrence T. Love and Stanley D. Matchett, then Assistant Chiefs, with the assistance of the directors and assistant directors of the Bureau's regional offices.

The coordination and acquisition of automatic data processing equipment were the responsibility of the Automatic Data Processing Planning Staff, James R. Pepal, then Chief, under the direction of Richard L. Pauly, then Deputy Chief.

The system design, technical specifications, construction, and installation of the FOSDIC and Automated Camera Technology System were the responsibility of Technical Services Division, McRae Anderson, then Chief, assisted by Robert E. Joseph, then Assistant Chief.

Questionflaire processing procedures were developed in the Decennial Processing Staff, James S. Werking, then Chief, under the direction of Harry C. O'Haver, then Assistant Chief. The manual processing and microfilming of the questionnaires were performed at the Laguna Niguel Processing Office, Robert N. Scheller, Chief.

Administrative support was provided by the Administrative Services Division, O. Bryant Benton, then Acting Chief.

Publications editing, printing, and composition were performed in the Publications Services Division, Raymond J. Koski, Chief, under the direction of Milton S. Andersen, Arlene C. Duckett, and Gerald A. Mann.

User services were provided by the Data User Services Division under the supervision of Michael G. Garland, Chief, and Marshall L. Turner, Assistant Chief.

Many other persons participated in the various activities of the 1980 census. For a list of key personnel, refer to the History of the 1980 Census of Population and Housing, (PHC80-R2)

GENERAL

This report presents 100-percent data from the 1980 Census of Housing on general characteristics of housing units for Puerto Rico, classified by urban and rural residence and by size of place; its municipios, municipio subdivisions, census designated places, standard consolidated statistical area, standard metropolitan statistical areas, urbanized areas, and certain other geographic areas of Puerto Rico. The abbreviated identification for this report is HC80-1-A (i.e., Housing Census, 1980-Volume 1-Chapter A) followed by the number 53 representing Puerto Rico. Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

A large portion of the Housing information compiled from the 1980. Census of Population and Housing will appear in Volume 1, *Characteristics of Housing Units*, of which this report is part.

The 1980 census figures presented here may differ from those shown in the Advance Report, PHC80-V. The changes reflect corrections of errors found after the PHC80-V report was prepared. The changes may affect any geographic area shown in this report.

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes do not, however, affect to any appreciable extent the comparability between the 1980 data and the 1970 data shown in this report. Further information on comparability appears in Appendix B, "Definitions and Explanations of Subject Characteristics."

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains text (this introduction and five appendixes), a table of contents, charts, 17 detailed tables, and maps. A general location map and a map of Puerto Rico appear after the table of contents. The map of Puerto Rico shows municipio names and boundaries, the names and boundaries of standard consolidated statistical areas (SCSA's) and standard metropolitan statistical areas (SMSA's), the names and locations of all places with a population of 25,000 or more, and SMSA central cities with fewer than 25,000 inhabitants. Then follow two pages of charts that precede the 17 detailed tables. Each table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title.

The table finding guide on the inside front cover lists the characteristics covered in this report and shows the tables in which the various types of statistics appear. The amount of detail presented in this report is generally greater for larger places than for smaller ones. The greatest amount of detail is shown for Puerto Rico and its urban and rural parts and for SCSA's, SMSA's, urbanized areas, places with a population of 10,000 or more, and municipios. Somewhat less detail is shown for places of 2,500 to 10,000 and for rural portions of municipios. The least amount of detail is shown for places of 1,000 to 2,500 and for municipio subdivisions.

The tables are followed by a map section which includes:

- A "Municipio Location Index" which presents the reference coordinates and map section numbers for each municipio on the municipio subdivision map, the legend to the municipio subdivision map, and a Puerto Rico map outlining the geographic area covered by each municipio subdivision map section.
- A municipio subdivision map, often covering several pages, that shows the names and boundaries of municipios, their subdivisions, and places, as recognized by the Census Bureau in the published tables.
- One map for each urbanized area which shows the names and boundaries of Puerto Rico, municipios, municipio subdivisions, and places, as well as the extent of territory defined as "urbanized."

Appearing last in the report are the appendixes. Appendix A describes the various area classifications (e.g., urban and rural residence, census designated

places, and urbanized areas). Appendix B provides definitions and explanations for the subjects covered in this report. Appendix C briefly explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix D presents information on the sources of error in the data, editing procedures, and a description of allocation tables A-1 and A-2. Appendix E shows a facsimile of the 1980 census questionnaire pages showing the 100-percent population and housing questions and facsimile of the respondent instructions.

DERIVED FIGURES (Means, Medians, and Percents)

This report presents means, medians, and percents, as well as certain rates and ratios. The median—a type of average—is the middle value in a distribution; i.e., the median divides the distribution into two equal parts: one-half of the cases fall below the median and one-half of all the cases exceed the median. Percents and other derived measures which round to less than 0.1 are not shown but indicated as zero (i.e., "—").

Medians for rooms are rounded to the nearest tenth, for persons to the nearest hundredth, for value to the nearest hundred dollar, and for contract rent to the nearest dollar. In computing medians for rooms and persons per housing unit, the whole number is used as the midpoint of the interval so that, for example, the category "3 rooms" is treated as an interval ranging from 2.5 up to 3.5 rooms. In computing median rent, units reported as "no cash rent" are excluded. The median is computed on the basis of

the distribution as tabulated, which is sometimes more detailed than the distribution shown in this report. When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; thus, for example, if the median falls in the category "Less than \$2,000," it is shown as "\$2,000-." When the median falls in the upper terminal category of an open-ended distribution, the initial value of the terminal category is given followed by a plus sign; thus, for example, if the median falls in the category "\$100,000 or more," it is shown as "\$100,000+."

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations are used in the tables:

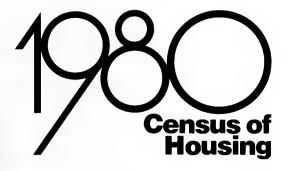

- A dash "-" represents zero or a percent which rounds to less than 0.1.
- Three dots "..." mean not applicable, or that the data are being withheld to avoid disclosure of information for individual housing units. (For further information on disclosure, see the section below on "Suppression of Data for Confidentiality.")
- (NA) means not available.
- A minus sign preceding a figure denotes decrease.
- SCSA is standard consolidated statistical area.
- SMSA is standard metropolitan statistical area.

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Census Bureau takes precautions to make sure that its published data do not disclose information about particular individuals and housing units. To accomplish this, the Bureau suppresses data for some characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression may take place.

The general rules of primary suppression are as follows: Counts of total population are never suppressed; other characteristics for persons are shown only if there are 15 or more persons in the geographic area; counts of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown only when there are five or more yearround housing units in the geographic area; characteristics of families, households, or occupied housing units are shown only if there are at least five occupied housing units within the geographic area; and distributions of data for owners or renters are shown only where the number of owners is at least five and the number of renters is also at least five. These primary suppression criteria are applied independently of one another.

In some cases, complementary suppression is applied to prevent the derivation of primary suppressed data by subtraction. For example, housing unit data shown by tenure may require complementary suppression when the number of owner-occupied or renter-occupied housing units is less than five.

PUERTO RICO

The 78 municipios are the constituent units of Puerto Rico.

MUNICIPIOS

In Puerto Rico, the primary divisions are termed municipios. Each municipio has legally established boundaries and constitutes a governmental unit. Two municipios have been created since 1970, Canóvanas and Florida, which were separated from Loíza and Barceloneta Municipios, respectively. Each municipio, with the exception of Florida, contains a ciudad or pueblo in which the seat of government is located. Florida municipio has its seat of government in the Florida Adentro barrio.

MUNICIPIO SUBDIVISIONS

Municipios in Puerto Rico are subdivided into:

- 1. Ciudades, pueblos, and barrios, Barrios are the primary subdivisions of municipios. The barrios have legally established boundaries, but do not constitute a governmental unit. "Ciudad" or "pueblo" is the name given to the barrio or group of barrios which identifies the municipio center of government. Ciudades, pueblos, and barrios essentially serve as election districts and as the basis for apportionment of the Commonwealth legislature. Many municipio subdivisions have been redefined since 1970 to reflect their legal boundaries, which were not used in many instances in 1970 census reports. There are two ciudades in Puerto Rico, Ponce and San Juan, which consist of groups of barrios.
- 2. Subbarrios. The subbarrios serve as electoral and representational entities, further subdividing ciudades, some pueblos, and, in three municipios—Ponce, San Juan, and Salinas—barrios other than the ciudad or pueblo. There are subbarrios in 23 municipios.

PLACES

The Puerto Rico census reports recognize one type of place—the census designated places. These places are identified as zonas urbanas and aldeas. The stateside census reports recognize, in addition to the census designated places, the incorporated places.

Incorporated places recognized in the stateside census reports are those which are incorporated under the laws of their respective states as cities, boroughs, towns, and villages. There are no incorporated places in Puerto Rico. Although ciudades (cities) and pueblos (towns) in Puerto Rico have legally established limits, they are not incorporated and are recognized for census purposes as municipio subdivisions rather than places.

Census Designated Places

As in the 1950, 1960, and 1970 censuses, the Census Bureau, in cooperation with

the Puerto Rico government, delineated boundaries for closely settled population centers without corporate limits. In 1980, such places are referred to as "census designated places" (CDP's). In Puerto Rico, the CDP's are identified as "zonas urbanas" and "aldeas." To be recognized for the 1980 census, aldeas must have a minimum 1980 population of 1,000; however, zonas urbanas are recognized regardless of population size.

Census designated place boundaries change with changes in the settlement pattern; a place which has the same name as in previous censuses does not necessarily have the same boundaries. Boundary outlines for CDP's appear on the municipio subdivision map. Detailed maps are available for purchase from the Census Bureau.

Zonas urbanas—Zonas urbanas are composed of the municipio seat of government and the adjacent built-up area. Zonas urbanas are delineated by the Puerto Rico Planning Board under authorization of the Puerto Rico Planning Act of 1975. Figures are published for all zonas urbanas regardless of the number of inhabitants. In 1970, zonas urbanas were incorrectly referred to as ciudades and pueblos, and the legal ciudad/pueblo boundaries were not recognized. Zonas urbanas had not been recognized prior to the 1970 census.

Aldeas—Aldeas are closely settled population centers with no legally defined limits. The aldea boundaries were delineated by the Puerto Rico Planning Board following procedures established by the Census Bureau.

URBAN AND RURAL RESIDENCE

As defined for the 1980 census, urban housing comprises all housing units in urbanized areas and in places of 2,500 or more inhabitants outside urbanized areas.

More specifically, urban housing consists of all housing units in (1) places of 2,500 or more inhabitants identified as zonas urbanas and aldeas; and (2) other territories included in urbanized areas. Housing units not classified as urban constitute rural housing. Information on the historical development of the urban-rural residence definition appears in the 1980 Census of Population Report, Characteristics of the Population, Number of Inhabitants, PC80-1-A.

URBANIZED AREAS

Definition

The major objective of the Census Bureau in delineating urbanized areas is to provide a better separation of urban and rural population and housing in the vicinity of large cities. An urbanized area consists of a central city or cities and surrounding closely settled territory or "urban fringe."

The following criteria are used in determining the eligibility and definition of the 1980 urbanized areas.¹

An urbanized area comprises a place and adjacent densely settled surrounding area that together have a minimum population of 50,000.² The densely settled surrounding area consists of:

- 1. Contiguous places having:
 - a. A population of 2,500 or more; or,
 - b. A population of fewer than 2,500 but having a population density of 1,000 persons per square mile, a closely settled area containing a minimum of 50 percent of the population, or a cluster of at least 100 housing units.
- Contiguous area which is connected by road and has a population density of at least 1,000 persons per square mile.³

- Other contiguous area with a density of less than 1,000 persons per square mile, provided that it:
 - a. Eliminates an enclave of less than
 5 square miles which is surrounded
 by built-up area.
 - b. Closes an indentation in the boundary of the densely settled area that is no more than 1 mile across the open end and encompasses no more than 5 square miles.
 - c. Links an outlying area of qualifying density, provided that the outlying area is:
 - Connected by road to, and is not more than 1½ miles from, the main body of the urbanized area
 - (2) Separated from the main body of the urbanized area by water or other undevelopable area, is connected by road to the main body of the urbanized area, and is not more than 5 miles from the main body of the urbanized area.
- Large concentrations of nonresidential urban area (such as industrial parks, office areas, and major airports), which have at least one-quarter of their boundary contiguous to an urbanized area.

A map of each urbanized area in Puerto Rico follows the detailed tables in this report.

Urbanized Area Titles

- The titles of urbanized areas existing prior to the 1980 Census of Population and Housing are retained unchanged except for mergers and for those areas meeting item 4 of the titling criteria.
- 2. The titles of new urbanized areas qualifying as the result of the 1980 census are determined as follows:
 - The name of the place with the largest population in the urbanized area is always listed.
 - b. The names of up to two additional places may be listed, with eligibility determined as follows:
 - (1) Those with a population of at least 250,000.
 - (2) Those with a population of 15,000 to 250,000, provided

that they are at least onethird the population of the largest place in the urbanized area.

- Area titles that include the names of more than one place start with the name of the largest and list the others in descending order of their population.
- Regional titles may be used to identify urbanized areas with populations over 1 million, in which case only the largest city of the urbanized area is included in the title.

Urbanized Area Central Cities

The central cities of urbanized areas are those named in the titles except where regional titles are used. In such cases, the central cities are those that have qualified under items 1 or 2 of the titling criteria.

STANDARD METROPOLITAN STATISTICAL AREAS

Definition

The general concept of a metropolitan area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. The standard metropolitan statistical area (SMSA) classification is a statistical standard developed for use by Federal agencies in the production, analysis, and publication of data on metropolitan areas. The SMSA's are designated and defined by the Office of Management and Budget. following a set of official published standards developed by the interagency Federal Committee on Standard Metropolitan Statistical Areas.

Each SMSA in Puerto Rico has one or more central municipios containing the area's main population concentration: an urbanized area with at least 50,000 inhabitants. An SMSA may also include outlying municipios which have close economic and social relationships with the central municipios. The outlying municipios must have a specified level of commuting to the central municipios and must also meet certain standards

¹ All references to population counts and densities relate to data from the 1980 census.

² For an urbanized area to be recognized, it must include a population of at least 25,000 that does not reside on a military base.

³ Any area of extensive nonresidential urban land use, such as airports, factories, parks, golf courses, and cemeteries, is excluded in computing the population density.

regarding metropolitan character, such as population density, urban population, and population growth.

The housing units in SMSA's may also be referred to as the metropolitan housing. The housing in SMSA's is subdivided into "inside central city (or cities)" and "outside central city (or cities)." The housing units outside SMSA's constitute the nonmetropolitan housing.

SMSA Titles

Most SMSA's have at least one central city. The titles of SMSA's include up to three city names. For the 1980 census, central cities of SMSA's are those named in the titles of the SMSA's. In Puerto Rico where there are no incorporated places recognized by the Bureau of the Census, zonas urbanas and aldeas may be recognized as central cities.

In this report, central cities of SMSA's, regardless of population are shown in the tables designated "... for Areas and Places." Thus, a central city with a population between 10,000 and 50,000 will not appear in the tables for places of 10,000 to 50,000.

New SMSA Standards

New standards for designating and defining metropolitan statistical areas were published in the Federal Register on January 3, 1980. The SMSA's recognized for the 1980 census comprise (1) all areas, including four in Puerto Rico, as defined on January 1, 1980, except for one in the United States area defined provisionally during the 1970's on the basis of population estimates but whose qualification was not confirmed by 1980 census counts; and (2) 36 new areas, including one in Puerto Rico, defined on the basis of 1980 census counts and the new standards that were published on January 3, 1980.

The new standards will not be applied to the areas existing on January 1, 1980, until after data on commuting flows become available from 1980 census tabulations. At that time, the boundaries, definitions, and titles for all SMSA's will be reviewed.

To aid users who want to become familiar with the SMSA standards and

how they are applied, documents are available from the Office of Management and Budget, Washington, D.C. 20503.

STANDARD CONSOLIDATED STATISTICAL AREAS

In some parts of the country, metropolitan development has progressed to the point that adjoining SMSA's are themselves socially and economically interrelated. These areas are designated standard consolidated statistical areas (SCSA's) by the Office of Management and Budget and are defined using standards included as part of the new SMSA standards described above.

RELATIONSHIP BETWEEN URBANIZED AREAS AND METROPOLITAN AREAS

Although the urbanized area and the metropolitan area are closely related in concept, there are important differences. The urbanized area has a more limited territorial extent. The urbanized area consists of the physically continuously built-up territory around each central city and thus corresponds generally to the core of high and medium population density at the heart of the metropolitan area. In concept, a metropolitan area is always larger than its core urbanized area, even if the metropolitan area is defined in terms of small building blocks. because it includes discontinuous urban and suburban development beyond the periphery of the continuously built-up area. The metropolitan area may also include some rural territory whose residents commute to work in the city or its immediate environs, while the urbanized area does not include such territory. In practice, because the SMSA definitions use municipios as building blocks, considerable amounts of rural territory with few commuters are often included.

Occasionally, a portion of the urbanized area extends across the SMSA boundary into a nonmetropolitan municipio or another SMSA. However, such portions are usually quite small in area and population.

The new SMSA standards provide that each SMSA be associated with an urbanized area. However, the reverse is

not true—there are some urbanized areas that are not in any SMSA. This situation occurs when an urbanized area does not qualify as an SMSA of at least 100,000 population and the urbanized area has no city with at least 50,000 population.

In addition, some SMSA's contain more than one urbanized area. This occurs when:

- Two or more urban concentrations not far apart and of generally similar size have separate urbanized areas but qualify as a single SMSA. Often the SMSA title includes the name of the largest city of each of the component urbanized areas.
- A very large SMSA includes a large urbanized area and one or more smaller separate urbanized areas within its boundaries.

BOUNDARY CHANGES

The boundaries of some of the areas shown in this report have changed between an earlier census for which counts are shown and January 1, 1980. The historic counts shown here for municipios, places, and urbanized areas have not been adjusted for such changes and thus reflect the number of persons in occupied housing units in the areas as defined at each census. In 1970 the legal ciudad/pueblo boundaries in many municipios were disregarded to include the built-up areas of contiguous barrios. These areas were incorrectly referred to as ciudades and pueblos in the 1970 reports. These places are equivalent to those identified as zonas urbanas in the 1980 census. The historic counts for SMSA's and SCSA's have been adjusted to reflect the areas defined as of the 1980 census. Information on boundary changes for municipio and municipio subdivisions is presented in table 4 of the 1980 Census of Population Report, Characteristics of the Population, Number of Inhabitants, PC80-1-A. For Information on boundary changes prior to 1970, see the Number of Inhabitants report for each census.

AREA MEASUREMENTS

Area measurement figures for municipios are available in table 2 of the PC80-1-A report for Puerto Rico.

GENERAL

The 1980 census of Puerto Rico was conducted through a combination of self-

enumeration and personal interview. The principal determinant for the responses was, therefore, the questionnaire and its accompanying instructions. Furthermore, census takers were instructed, in their personal-visit interviews, to read the questions directly from the questionnaire. The definitions and explanations given below for each subject are drawn largely from various technical and procedural materials used in the collection of the data. These materials helped the census interviewers to understand more fully the intent of each question, and thus to resolve problems or unusual cases in a manner consistent with this intent. Also included is certain explanatory information to assist the user in the proper utilization of the statistics.

Facsimiles of the questionnaire pages containing the 100-percent population and housing questions used to produce the data shown in this report and the pages of the respondent instructions which relate to these questions are presented in appendix E.

LIVING QUARTERS

Living quarters are classified in the census as either housing units or group quarters. Usually, living quarters are in structures intended for residential use (e.g., a one-family home, apartment house, hotel or motel, boarding house, mobile home or trailer). However, living quarters may also be in structures intended for nonresidential use (e.g., the rooms in a ware-house where a night guard lives), as well as in boats, tents, vans, etc.

Housing Units—A housing unit is a house, an apartment, a group of rooms, or a single room occupied as a separate living quarters or, if vacant, intended for occupancy as a separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the

building and which have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together or any other group of related or unrelated persons who share living arrangements (except as described in the next section on Group Quarters). For vacant units, the criteria of separateness and direct access are applied to the intended occupants whenever possible. If that information cannot be obtained, the criteria are applied to the previous occupants. Both occupied and vacant housing units are included in the housing unit inventory except that boats, tents, vans, caves, and the like are included only if they are occupied as someone's usual place of residence. Vacant mobile homes are included provided they are intended for occupancy on the site where they stand. Vacant mobile homes on dealers' sales lots or in storage are excluded from the housing inventory.

Comparability With 1970 Census Housing Unit Data-Although the 1980 data are generally comparable with 1970 data, certain changes were introduced for 1980. The part of the 1970 housing unit definition that required a unit to have either (1) direct access or (2) cooking facilities for exclusive use was modified. For 1980, the cooking facilities for exclusive use alternative was dropped, and only direct access was required of all housing units. In 1970, vacant mobile homes were not counted as housing units. For 1980, they were included in the housing inventory provided they were intended for occupancy on the site where they stood.

Group Quarters—Group quarters are any living quarters which are not classified as housing units. There are two types of group quarters: (1) institutional group quarters, and (2) noninstitutional group quarters. Institutional group quarters are

living quarters occupied by one or more persons under care or custody, such as children in an orphanage, persons in a nursing home, prisoners in a penitentiary. Noninstitutional group quarters include living quarters such as college-owned dormitories, fraternity and sorority houses, nurses' dormitories, and boarding houses. In addition, noninstitutional group quarters include any living quarters (other than those classified as institutional group quarters) which are occupied by 9 or more persons unrelated to the householder, or by 10 or more unrelated persons. Information on the housing characteristics of group quarters was not collected in the census.

Comparability With 1970 Group Quarters Data-In 1970, a unit was classified as group guarters if the head of the household shared the unit with five or more persons unrelated to him or her or if six or more unrelated persons were living together in the unit. For 1980, that requirement was raised to 9 or more persons unrelated to the resident who owns or rents the living quarters or 10 or more persons unrelated to each other. The household reference person in 1970 was the "head of the household" (the husband in married-couple families). For 1980, it was changed to the household member (or one of the members) in whose name the housing unit was owned or rented.

Rules for Hotels, Rooming Houses, Etc.—Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents, i.e., persons who consider the hotel as their usual place of residence or who have no usual place of residence elsewhere. Vacant rooms or suites of rooms are classified as housing units only in those hotels in which 75 percent or more of the accommodations are occupied by permanent residents.

If any of the occupants in a rooming or boarding house live and eat separately from everyone else in the building and have direct access, their quarters are classified as separate housing units. The remaining quarters are combined. If the combined quarters contain eight or fewer roomers unrelated to the householder, they are classified as one housing unit. If the combined quarters contain nine or more roomers unrelated to the house-

holder or person in charge, they are classified as group quarters.

Staff Living Quarters—The living quarters occupied by staff personnel within any group quarters are separate housing units if they satisfy the housing unit criteria of separateness and direct access; otherwise, they are considered as group quarters.

Year-Round Housing Units—Data on housing characteristics in the 1980 census reports are limited to year-round housing units; i.e., all occupied units plus vacant units available or intended for year-round use. Vacant units intended for seasonal occupancy are excluded because of the difficulty of obtaining reliable data on their characteristics. Counts of the total housing inventory, however, are given for each area presented in this report.

OCCUPANCY AND VACANCY CHARACTERISTICS

Occupied Housing Units-A housing unit is classified as occupied if it is the usual place of residence of the person or group of persons living in it at the time of enumeration; or if the occupants are only temporarily absent; e.g., away on vacation. If all the persons staying in the unit at the time of the census have their usual place of residence elsewhere, the unit is classified as vacant. A household includes all the persons who occupy a housing unit as their usual place of residence. In this report, by definition, the count of occupied housing units is the same as the count of households in the 1980 Census of Population reports.

Persons in Occupied Housing Units—"Persons in occupied housing units" is the total population less those persons living in group quarters. "Persons per occupied housing unit" is computed by dividing the population living in housing units by the number of occupied housing units. Data are also presented separately for the population in owner-occupied and in renter-occupied housing units.

Vacant Housing Units—A housing unit is vacant if no one is living in it at the time of enumeration, unless its occupants are only temporarily absent. Units temporarily occupied at the time of enumeration entirely by persons who have a usual

residence elsewhere are also classified as vacant.

New units not vet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if they are open to the elements, i.e., the roof, walls, windows, and/or doors no longer protect the interior from the elements, or if there is positive evidence (such as a sign on the house or in the block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store or an office, or quarters used for the storage of business supplies or inventory, machinery, or agricultural products.

Type of Vacant Unit-Vacant housing units are classified in this report as either "seasonal" or "year-round," "Seasonal" units are intended for occupancy during only certain seasons of the year. Included are units intended for recreational use, such as beach cottages and summer cabins, etc., as well as units offered to vacationers in the summer for summer sports. "Year-round" vacant housing units are available or intended for occupancy at any time of the year. A unit in a resort area which is usually occupied on a year-round basis is considered as year-round. A unit used only occasionally throughout the year is also considered as year-round.

Vacancy Status—The data on vacancy status were tabulated from responses to questionnaire item C (see item C in Appendix E, "Facsimiles of Respondent Instructions and Questionnaire Pages"). Year-round vacant units are subdivided according to their vacancy status as follows:

For sale only. Vacant year-round units being offered "for sale only," including individual units in cooperatives and condominium projects if the individual units are offered "for sale only."

For rent. Vacant year-round units offered "for rent," and vacant units offered either "for rent" or "for sale."

Rented or sold, awaiting occupancy. It any money rent has been paid or agreed upon but the new renter has not moved in as of the date of enumeration, or if the unit has recently been sold but the new owner has not yet moved in, the year-round vacant unit is classified as "rented or sold, awaiting occupancy."

Held for occasional use. This category consists of vacant year-round units which are held for weekend or other occasional use throughout the year. Shared ownership or time-sharing condominiums are also classified as "held for occasional use." Homes reserved by their owners as second homes usually fall in this category, although some second homes may be classified as "seasonal."

Other vacant. If a vacant year-round unit does not fall into any of the classifications specified above, it is classified as "other vacant." For example, this category includes units held for settlement of an estate, units held for occupancy by a caretaker or janitor, and units held for personal reasons of the owner.

Boarded-Up Status—Boarded-up units refer to vacant structures in which the windows and doors are covered by wood, metal, or similar materials to protect the interior, and to prevent entry into the building. A single unit structure or a unit(s) in a multi-unit structure may be boarded up in this way. In this report, data for boarded-up units are only shown for units in the "other vacant" category.

Homeowner Vacancy Rate—The homeowner vacancy rate is the percentage relationship between the vacant year-round units for sale and the total homeowner inventory. It is computed by dividing the number of vacant year-round units for sale by the sum of the owner-occupied units and the vacant year-round units for sale only. Vacant units that are seasonal or held off the market are excluded.

Rental Vacancy Rate—The rental vacancy rate is the percentage relationship of the vacant year-round units for rent to the total rental inventory. It is computed by dividing the number of vacant year-round units for rent by the sum of the renter-occupied units and the vacant year-round units for rent. Vacant units that are seasonal or held off the market are excluded.

Duration of Vacancy-The statistics on duration of vacancy refer to the length of time (in months) from the date the last occupants moved from the unit to the date of enumeration (see item D in Appendix E, "Facsimiles of Respondent Instructions and Questionnaire Pages"). The data, therefore, do not provide a direct measure of the total length of time units remain vacant. For newly constructed units which have never been occupied, the duration of vacancy is counted from the date construction was completed. For recently converted or merged units, the time is reported from the date conversion or merger was completed.

Tenure—A housing unit is "owner occupied" if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. All other occupied units are classified as "renter occupied," including units rented for cash rent and those occupied without payment of cash rent (see question H7 in Appendix E, "Facsimiles of Respondent Instructions and Questionnaire Pages").

Condominium Housing Units—A condominium involves ownership that enables a person to own an apartment or house in a development of similar units and to hold a common or joint ownership in common areas, hallways, entrances, elevators, etc. The owner has a deed to the individual unit and, very likely, a mortgage on the unit. A condominium housing unit need not be occupied by the owner to be counted as such.

Comparability With 1970 Census Condominium Housing Unit Data—In 1970, owner-occupied cooperatives and condominium housing units were identified together. The 1980 census identifies only condominium housing units. The 1980 question provides data on vacant and renter-occupied condominium housing units, not just owner-occupied condominium housing units as in 1970.

UTILIZATION CHARACTERISTICS

Persons—All persons occupying the housing unit are counted. These persons include not only occupants related to the householder but also any lodgers,

roomers, boarders, roommates, wards, foster children, and resident employees who share the living quarters of the householder. The data on "persons in unit" show the number of housing units occupied by the specified number of persons.

Rooms-The statistics on "rooms" are in terms of the number of housing units with a specified number of rooms (see question H6 in Appendix E, "Facsimiles of Respondent Instructions and Questionnaire Pages"). The intent of this question is to count the number of whole rooms used for living purposes. For each unit they include living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, enclosed porches suitable for year-round use, and lodger's rooms. Excluded are bathrooms, open porches, balconies, halls, utility rooms, unfinished attics or basements, or other unfinished space used for storage. A partially divided room is a separate room only if there is a partition from floor to ceiling.

Persons Per Room—"Persons per room" is a derived measure obtained by dividing the number of persons in each occupied housing unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of occupied housing units having the specified ratio of persons per room.

STRUCTURAL CHARACTERISTICS

Plumbing Facilities-The category "Complete plumbing for exclusive use" consists of units which have piped water (either hot and cold or only cold), a flush toilet, and a bathtub or shower inside the building for the exclusive use of the occupants of the unit. "Lacking complete plumbing for exclusive use" includes those conditions when (1) all three specified plumbing facilities are present inside the building, but are also used by another household; (2) some but not all the facilities are present; or (3) none of the three specified plumbing facilities is present, (see question H5 in Appendix E, "Facsimiles of Respondent Instructions and Questionnaire Pages").

Comparability With 1970 Census Plumbing Facilities Data—Both in 1970 and 1980, there were separate questions asked in Puerto Rico on the presence of hot and cold piped water, a bathtub or shower, and a flush toilet. For 1980, as in 1970, the tabulations on complete plumbing facilities required that the facilities be inside the building. In addition for 1980, if the unit did not have a flush toilet, the respondents were asked to identify their toilet facilities as follows: privy, other or none. In 1970, only a sample of the units were asked to provide that identification.

Tabulations in this report present data on units having complete plumbing facilities and units lacking complete plumbing facilities. Data are also shown separately for each of the plumbing facilities: piped water in the building, flush toilet, and bathtub or shower.

Units in Structure—A structure is a separate building that either has open space on all sides or is separated from other structures by dividing walls that extend from ground to roof. In the determination of the number of units in a structure, all housing units, both occupied and vacant, were counted. The statistics are presented for the number of housing

units in structures of specified type and size, not for the number of residential buildings. Tabulations showing separately the category "Mobile home or trailer, etc.," include units classified as mobile homes or trailers, boats, tents, vans, etc.

FINANCIAL CHARACTERISTICS

Value—Value is the respondent's estimate of how much the property (house and lot) or condominium unit would sell for, if it were for sale. For vacant units, value is the price asked for the property (see question H11 in Appendix E, "Facsimiles of Respondent Instructions and Questionnaire Pages").

Value and price asked are tabulated separately for certain kinds of housing units. Value statistics are presented for "specified owner-occupied" housing units and "specified vacant for sale only" housing units. These "specified" housing units include only one-family houses on less than 3 cuerdas without a commercial establishment or medical office on the property. (A cuerda is approximately 0.97 acres.) Mobile homes, trailers, boats, tents or vans occupied as a usual residence, and owner-occupied noncondo-

minium units in multifamily buildings are also excluded from the value tabulations.

To maintain comparability with previous censuses, value is shown separately, for condominium housing units. In this report, statistics on value are presented for all owner-occupied condominium housing units but are not shown for "vacant for sale only" condominium housing units.

Contract Rent—Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. For vacant units, it is the rent asked for the unit at the time of enumeration (see question H12 in Appendix E," Facsimiles of Respondent Instructions and Questionnaire Pages").

The statistics on rent are tabulated for "specified renter-occupied" housing units and for "specified vacant for rent" housing units which include renter units except one-family houses on 3 cuerdas or more. Respondents were asked to report rent only for the housing unit enumerated and to exclude any rent paid for additional units or for business premises. Renter units occupied without payment of cash rent are shown separately as "no cash rent" in the rent tabulations.

Appendix C.—General Enumeration and Processing Procedures

USUAL PLACE OF RESIDENCE

In accordance with census practice dating back to the first U.S. Census in 1790, each person enumerated in the 1980 census was counted as an inhabitant of his or her "usual place of residence," which is generally construed to mean the place where the person lives and sleeps most of the time. This place is not necessarily the same as the person's legal residence or voting residence. In the vast majority of cases, however, the use of these different bases of classification would produce substantially the same statistics, although there might be appreciable differences for a few areas.

The implementation of this practice has resulted in the establishment of residence rules for certain categories of persons whose usual place of residence is not immediately apparent. Furthermore, this practice means that persons were not always counted as residents of the place where they happened to be staying on Census Day (April 1). Persons without a usual place of residence, however, were counted where they happened to be staying. Detailed information on residence rules is given in the 1980 Census of Population, Characteristics of the Population, Number of Inhabitants, PC80-1-A.

DATA COLLECTION PROCEDURES

The 1980 Census of Puerto Rico was conducted through a combination of self-enumeration and personal interview. In areas with postal delivery service, an ad-

vance census questionnaire which contained explanatory information and a limited number of questions was delivered by postal carrier to every household on his or her route several days before Census Day, April 1, 1980. The householder was requested to fill out the questionnaire and give it to the enumerator when he or she visited the household. Incomplete, inconsistent, and unfilled forms were completed by interview during the enumerator's visit. In areas without postal carrier delivery service, all housing units were enumerated through personal interview; even when some advance questionnaires were left by the postal carriers in places people use to pick up their mail. Vacant units were enumerated by a personal visit and observation

Each household in Puerto Rico was enumerated using one of two versions of the census questionnaire: a short-form questionnaire containing a limited number of basic population and housing questions or a long-form questionnaire which contained these basic questions as well as a number of additional questions. A sampling procedure was used to determine those households which were to answer the long-form questionnaire. At the time of the enumerator's visit, one in every six households (about 17 percent) was asked to answer the long form or sample questionnaire. Census questionnaires were available in Spanish and in English.

Special questionnaires were used for the enumeration of persons in group quarters such as colleges and universities, hospitals, prisons, military installations, and ships. These forms contained the same population questions which appeared on either the short or the long form, but did not include any housing questions.

PROCESSING PROCEDURES

The Puerto Rico 1980 census questionnaires were processed in a manner similar to that for the 1970 census. They were designed to be processed electronically by the Film Optical Sensing Device for Input to Computer (FOSDIC). For most items on the questionnaire, the information supplied by the respondent or obtained by the enumerator was indicated by marking the answers in predesignated positions that would be "read" by FOSDIC from a microfilm copy of the questionnaire and transferred onto computer tape with no intervening manual processing. The computer tape did not include information on individual names and addresses.

In the processing for 100-percent data, all short forms, and pages 2 and 3 of the long forms (which have the same questions as the short form), were microfilmed, "read" by FOSDIC, and transferred onto computer tape for tabulation.

The tape containing the information from the questionnaires was processed on the Census Bureau's computers through a number of editing and tabulation steps. Among the products of this operation were computer tapes from which the tables in this report (and most others in the 1980 census publications) were prepared on phototypesetting equipment at the Government Printing Office.

A more detailed description of the data collection and processing procedures can be obtained from the 1980 Census of Population and Housing, *Users' Guide*, PHC80-R1.

Appendix D.—Accuracy of the Data

SOURCES OF ERROR

Since 1980 population and housing counts shown in this report were tabulated from the entries for persons and housing units on all questionnaires, these counts are not subject to sampling error. In any large-scale statistical operation such as a decennial census, human and mechanical errors occur. These errors are commonly referred to as nonsampling errors, Such errors include failure to enumerate every housing unit or person in the population. not obtaining all required information from respondents, obtaining incorrect or inconsistent information, and recording information incorrectly. Errors can also occur during the field review of the enumerators' work, the clerical handling of the census questionnaires, or the electronic processing of the questionnaires.

In an attempt to reduce various types of nonsampling error in the 1980 census, a number of techniques were introduced on the basis of experience in previous censuses and in tests conducted prior to the census. These quality control and review measures were utilized throughout the data collection and processing phases of the census to minimize undercoverage of the population and housing units and to keep the errors at a minimum.

EDITING OF UNACCEPTABLE DATA

The objective of the processing operation is to produce a set of statistics that describes the housing of Puerto Rico as accurately and clearly as possible. To meet this objective, certain unacceptable entries were edited.

In the field, questionnaires were reviewed for omissions and certain inconsistencies by a census clerk or an enumerator and, if necessary, a followup was made to obtain missing information. In

addition, a similar review of questionnaires was done in the central processing office. As a rule, however, editing was performed by hand only when it could not be done effectively by machine.

As one of the first steps in editing, the configuration of marks on the questionnaire column was scanned electronically to determine whether it contained information for a housing unit or merely spurious marks. If any characteristic for a housing unit was still missing when the questionnaires reached the central processing offices, they were supplied by allocation. Allocations, or assignments of acceptable codes in place of unacceptable entries, were needed most often when an entry for a given item was lacking or when the information reported for a housing unit on that item was inconsistent with other information for the housing unit. As in previous censuses, the general procedure for changing unacceptable entries was to assign an entry for a housing unit that was consistent with entries for other housing units with similar characteristics. For example, if the unit was reported as rented but the amount of rent was missing, the computer automatically assigned the rent that was reported for the preceding renteroccupied unit. The assignment of acceptable codes in place of blanks or unacceptable entries, it is believed, enhances the usefulness of the data.

The editing process also includes another type of correction; namely, the assignment of a full set of characteristics for a person or a housing unit. The assignment of the full set of housing characteristics occurs when there is no housing information available. If the housing unit is determined to be occupied, the housing characteristics are assigned from the previously processed occupied unit. If the housing unit is vacant, the housing characteristics are assigned from the previously processed

vacant unit. When there was indication that a housing unit was occupied but the questionnaire contained no information for all or most of the people, although persons were known to be present, a previously processed household was selected as a substitute and the full set of characteristics for each substitute person was duplicated. These duplications fall into two classes: (1) "persons or housing units substituted due to noninterview," e.g., when a housing unit was indicated as occupied but the occupants or the housing unit characteristics were not listed on the questionnaire and (2) "persons or housing units substituted due to mechanical failure," e.g., when the questionnaire page was not properly microfilmed.

Specific tolerances were established for the number of computer allocations and substitutions that would be permitted. If the number of corrections was beyond the tolerance, the questionnaires in which the errors occurred were clerically reviewed. If it was found that the errors-resulted from damaged questionnaires, from improper microfilming, from faulty reading by FOSDIC of undamaged questionnaries, or from other types of machine failure, the questionnaires were reprocessed.

ALLOCATION TABLES

The extent of allocations in the editing process and their effect on each of the subjects are shown in tables A-1, A-2, and A-2a which follow table 17. In these tables, housing units with one or more allocations are stated as percentages of year-round housing units or occupied housing units. In some instances, these tables show percentages of a specified group of units. Percentages are not shown if the item is not published for the specified areas.

Appendix E.—Facsimiles of Respondent Instructions and Questionnaire Pages

NOTE: This is a translation of the Respondent Instructions which were only provided in Spanish.

INSTRUCTIONS FOR QUESTIONS 1 THROUGH 5

- List in question 1 (on page 1), the names of all the people who usually live here. Then turn to pages 2 and 3 where there are columns to list up to seven persons. In the first column print the name of one of the household members in whose name this home is owned or rented. If no household member owns or rents the living quarters, list in the first column any adult household member who is not a roomer, boarder, or paid employee. Print the names of the other household members, if any, in the columns which follow, using question 1 as a checklist.
- Fill a circle to show how each person is related to the person in column 1.

A stepchild or legally adopted child of the person in column 1 should be marked Son/daughter. Foster children or wards living in the household should be marked Roomer, boarder.

- Be sure to fill a circle for the sex of each person.
- Enter age at last birthday in the space provided (enter "O" for babies less than one year old). Also enter month and year of birth, and fill the appropriate circles. For an illustration of how to complete question 4, see the example. If age or month or year of birth is not known, give your best estimate.
- Couples who live together should report the marital status they consider to be the most appropriate.

If the person lives in a marital union without having a civil or religious matrimonial contract, mark Consensually married.

If the person's only marriage was annulled, fill the Never married circle.

INSTRUCTIONS FOR QUESTIONS H4 THROUGH H5

- H4. Fill the second circle only if you must go through someone else's living quarters to get to your own.
- H5a. Consider that you have hot water even if you have it only part of the time.

Hot water supplied by electric faucet attachment at the kitchen sink, an electric shower attachment, etc., is not piped hot water.

Plumbing facilities must be located in the same building as your living quarters to be counted as available for your unit or *inside* the building. Plumbing facilities may be located within your unit itself or they may be in the hallway, or in a room used by several units in the building.

H5b-c. Fill the Yes, but also used by another household circle if someone else who lives in the same building, but is not a member of your household, also uses the facilities. Fill this circle also if the occupants of living quarters now vacant would also use the facilities in your living quarters.

INSTRUCTIONS FOR QUESTIONS H6 THROUGH H12

- H6. Count only whole rooms used for living purposes, such as living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, family rooms, etc. Do not count bathrooms, kitchenettes, strip or pullmen kitchens, utility rooms, or other space used for storage.
- H7. Fill the Owned or being bought Circle if the living quarters are owned outright or are mortgaged. Also fill the Owned or being bought circle if the living quarters are owned but the land is rented.

Fill the Rented for cash rent circle if any money rent is paid. Rent may be paid by persons who are not members of your household.

Occupied without payment of cash rent includes, for example, a parsonage, military housing, a house or apartment provided free of rent by the owner, or a house or apartment occupied by a janitor or caretaker in exchange for services.

- H8. A condominium is housing in which the apartments of houses in a development are individually owned, but the common areas, such as lobbies, halls, etc., are jointly owned. The person owning a condominium very likely has a mortgage on the particular unit.
- H9. Fill only one circle

Count all occupied and vacant living quarters in the house or buildings, but not commercial establishments or office spaces.

Detached means there is open space on all sides, or the house is joined only to a shed or garage. Attached means that the house is joined to another house or building by at least one wall which goes from ground to roof.

Some examples of attached one-family houses are: each house in a duplex structure, each house in a townhouse or row house structure, a house joined to a nonresidential building, etc.

Some examples of multi-unit structures are: an apartment building, a three story house in which each floor contains a separate housing unit, etc.

Mark A one-family house detached from any other house when a mobile home of trailer has had one or more rooms added or built onto it; a porch or shed is not considered a room.

H10b. A commercial establishment is easily recognized from the outside, for example, a grocery store or barber shop. A medical office is a doctor's or dentist's office regularly visited by patients. Consider as other type of office one or more rooms used as a type of office other than a medical office.

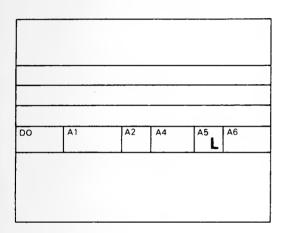

- H11. Include the value of the house, the land it is on, and any other structures on the same property. If the house is owned but the land is rented, estimate the combined value of the house and the land. If this is a condominium unit, enter the estimated value for your living quarters and your share of the common elements.
- H12. Report the rent agreed to or contracted for, even if the rent is unpaid or paid by someone else.

If rent is not paid by the month, change the rent to a monthly amount; and then fill the appropriate circle in Question H-12.

If rent is paid:	Multiply rent by
By the day	30
By the week	4
Every other w	eek 2

If rent is paid	: Divide rent by:
4 times a ye	ar 3
2 times a ye	ar 6
Once a year	12

1980 Census of Puerto Rico

Your answers are confidential

By law (title 13, U.S. Code), census employees are subject to fine and/or imprisonment for any disclosure of your answers. Only after 72 years does your information become available to other government agencies or the public. The same law requires that you answer the questions to the best of your knowledge.

NOTE: Responses to long-form questionnaires were obtained by personal interview, therefore no English or Spanish respondent instructions were printed.

A message from the Director, U.S. Bureau of the Census . . .

We must, from time to time, take stock of ourselves as a people if our Nation is to meet successfully the many national and local challenges we face. This is the purpose of the 1980 census.

The essential need for a population census was recognized almost 200 years ago when the Constitution of the United States was written. As provided by article 1, population censuses of the United States have been taken every 10 years. As part of the 1980 Census of Population and Housing, as required by title 13, United States Code, the U.S. Bureau of the Census is conducting the census of Puerto Rico as of April 1, 1980.

The law under which the census is taken protects the confidentiality of your answers. For the next 72 years — or until April 1, 2052 — only sworn census workers have access to the individual records, and no one else may see them.

Your answers, when combined with the answers from other people, will provide the statistical figures needed by public and private groups, schools, business and industry, and Federal, Commonwealth, and municipal governments. These figures will increase the understanding of how the Puerto Rican population and housing are changing. In this way, today's problems can be dealt with more effectively.

The census is a vitally important activity for Puerto Rico. Please do your part by filling out this census form accurately and completely. A census taker will visit your household to pick up the form; please keep it in a safe, convenient place until then.

Thank you for your cooperation.

U.S. Department of Commerce Bureau of the Census Form D-2E PR

Form Approved O.M.B. No. 41-S79051

Page 1

Question 1

List in Question 1

- Family members living here, including babies still in the hospital
- · Relatives living here
- · Lodgers or boarders living here.
- · Domestic employees or hired hands living here.
- ·Other persons living here
- College students who stay here while attending college, even if their parents live elsewhere
- Persons who usually live here but are temporarily away (including children in boarding school below the college level)
- Persons with a home elsewhere but who stay here most of the week while working

Do Not List in Question 1

- . Any person away from here in the Armed Forces.
- Any college student who stays somewhere else while attending college
- Any person who usually stays somewhere else most of the week while working there.
- Any person away from here in an institution such as a home for the aged or mental hospital.
- Any person staying or visiting here who has a usual home elsewhere.

NOTE

If everyone here is staying only temporarily and has a usual home elsewhere, please mark this box \square .

Then please:

- answer the questions on pages 2 through 5 only, and
- enter the address of the usual home on page 20.

Please continue -

NEGOCIADO DEL CENSO Bruce Chapman, Director C.L. Kincannon, Director Diputado

DIVISIÓN DE VIVIENDA Arthur F. Young, Jefe

Reconocimiento

Muchas personas participaron en las distintas actividades del censo de 1980. Estos reconocimientos refleian, en términos generales, los funcionarios durante los procedimientos para tomar el censo. El Negociado del Censo estuvo dirigido por Vincent P. Barabba, entonces Director y Daniel B. Levine, entonces Director Diputado. La dirección principal del programa censal fue llevada a cabo por George E. Hall, entonces Director Asociado para Áreas demográficas, asistido por Earle J. Gerson, entonces Director Auxiliar para Censos Demográficos, en conjunto con Barbara A. Bailar, Directora Asociada para Normas y Metodología Estadística, Howard N. Hamilton, Director Asociado para Servicios de Computadora, Shirley Kallek, Directora Asociada para Áreas Econômicas, James D. Lincoln, Director Asociado para Administración, Rex L. Pullin, entonces Director Asociado para Operaciones de Campo, y W. Bruce Ramsay, entonces Director Asociado para Tecnología Informativa. El personal bajo el Director fue asistido por Peter A. Bounpane y Sherry L. Courtland.

Este informe fue escrito en la División de Vivienda bajo la supervisión de Arthur F. Young, Jefe, y Leonard J. Norry, Asistente al Jefe, por William A. Downs, Jefe de la Unidad de Planificación Decenal y Servicio de Datos, asistido por Sherry A. Briscoe e Higinio Feliciano.

La responsabilidad de planificar, coordinar y elaborar el censo de 1980 descansó en la División de Censos Decenales bajo la dirección de Gerald J. Post, entonces Jefe Interino, asistido por Marie G. Argana, Rachel F. Brown, Donald R. Dalzell, H. Ray Dennis, Leonard Goldberg, Morris Gorinson, Earle B. Knapp, Jr., y Roger O. Lepage. La Oficina de Áreas del Exterior de los Estados Unidos estuvo bajo la dirección de Carmina Fernández Young, entonces Jefe, asistida por Irma F. Harahush y Ángel M. Landrón.

La base de datos y el sistema general de apoyo fueron desarrollados y proporcionados por la División de Desarrollo de Sistemas, Judy M. Bedell, entonces Jefe, bajo la dirección de John Jerry Bell, entonces Asistente al Jefe.

La elaboración de datos por computadora se llevó a cabo en la División de Operaciones de Computadora, C. Thomas DiNenna, entonces Jefe y John E. Halterman, entonces Asistente al Jefe.

La División de Métodos Estadísticos tuvo en gran medida la responsabilidad del desarrollo de nuevos procedimientos dirigidos a obtener un recuento más exacto de la población. Esta labor fue supervisada por Charles D. Jones, Jefe, David V. Bateman, entonces Asistente al Jefe, Susan M. Miskura y Robert T. O'Reagan, Asistentes al Jefe.

Los programas y la planificación geográfica se desarrollaron en la División de Geografía, bajo la dirección de Gerald F. Cranford, entonces Asistente al Jefe, Robert W. Marx, Silla G. Tomasi, Asistentes al Jefe y Donald I. Hirschfeld, Asistente Especial. Joseph J. Knott coordinó las fases geográficas de las operaciones.

Las actividades de recopilación de datos fueron supervisadas en la División de Campo por Richard C. Burt, entonces Jefe, bajo la dirección de Lawrence T. Love y Stanley D. Matchett, entonces Asistentes al Jefe, con el apoyo de los directores y de los directores auxiliares de las oficinas regionales del Negociado del Censo.

La coordinación y adquisición del equipo automático para la elaboración de datos fueron responsabilidad de la Unidad para la Planificación de la Elaboración Automática de Datos, James R. Pepal, entonces Jefe, bajo la dirección de Richard L. Pauly, entonces Asistente al Jefe.

El diseño del sistema, las especificaciones técnicas, la construcción e instalación de FOSDIC y el Sistema Tecnológico de Cámaras Automáticas fueron responsabilidad de la División de Servicios Técnicos, McRae Anderson, entonces Jefe, asistido por Robert E. Joseph, entonces Asistente al Jefe.

Los procedimientos para la elaboración de los cuestionarios fueron desarrollados por la Oficina de Elaboración Decenal, James S. Werking, entonces Jefe, bajo la dirección de Harry C. O'Haver, entonces Asistente al Jefe. La elaboración manual y microfilmación de los cuestionarios se llevó a cabo en la Oficina de Procesamiento en Laguna Niguel, California, Robert N. Scheller, Jefe.

El apoyo administrativo fue provisto por la División de Servicios Administrativos, O. Bryant Benton, entonces Jefe Interino.

La revisión, impresión y composición de las publicaciones fue responsabilidad de la División de Servicios de Publicaciones, Raymond J. Koski, Jefe, bajo la dirección de Milton S. Andersen, Arlene C. Duckett, y Gerald A. Mann.

Los servicios a los usuarios fueron proporcionados por la División de Servicios a los Usuarios de Datos, bajo la supervisión de Michael G. Garland, Jefe, y Marshall L. Turner, Asistente al Jefe.

Muchas otras personas participaron en las diversas actividades del censo de 1980, Para una lista del personal clave, refiérase a la publicación *History of the 1980 Census of Population and Housing*, (PHC80-R2).

GENERAL

Este informe presenta los datos de 100por ciento compilados en el Censo de Vivienda de 1980 sobre características generales de las unidades de vivienda para Puerto Rico, clasificadas por residencia urbana y rural y por tamaño del lugar, sus municipios, subdivisiones de municipios, lugares designados por el censo (zonas urbanas, aldeas), áreas estadísticas consolidadas estándares, áreas estadísticas metropolitanas estándares, áreas urbanizadas y ciertas otras áreas geográficas de Puerto Rico. La identificación abreviada de este informe es HC80-1-A (i.e., Censo de Vivienda, 1980-Volumen I-Capítulo A) seguido por el número 53 representando a Puerto Rico. La disposición legal para este censo, el cual fue levantado el primero de abril de 1980, está contenida en la Ley del Congreso del 31 de agosto de 1954 (enmendada en agosto de 1957, diciembre de 1975 y octubre de 1976), la cual codifica el Título 13 del Código de los Estados Unidos.

Una gran porción de la información de viviendas recopilada en el Censo de Población y Vivienda de 1980 aparecerá en el Volumen I, Características de las Unidades de Vivienda, del cual este informe es parte.

Las cifras del censo de 1980 presentadas aquí pueden ser diferentes de las que aparecen en el *Advance Report*, PHC80-V. Los cambios reflejan correcciones de errores encontrados después de la preparación de dicho informe y podrían

afectar cualquier área geográfica presentada en este informe.

El contenido y los procedimientos del censo de 1980 se determinaron después de la evaluación de los resultados del censo de 1970, de consultas con una gran variedad de usuarios de los datos censales v de extensas pruebas en el campo. En 1980 se introdujeron un número de cambios para mejorar la utilidad de los resultados del censo. Sin embargo, los cambios no afectan a un grado apreciable la comparabilidad entre los datos de 1980 v los datos de 1970 presentados en este informe. Información adicional sobre comparabilidad aparece en el Apéndice B, "Definiciones y Explicaciones de las Características de los Temas."

Mediante solicitud escrita al Director del Negociado del Censo en Washington, D.C., se puede obtener información más detallada sobre los asuntos técnicos y procesales que se tratan en el texto de este informe. Tal información se incluirá también en otras publicaciones del censo de 1980.

CONTENIDO DEL INFORME

Este informe consiste de un texto (esta introducción y cinco apéndices), una tabla de contenido, gráficas, 17 tablas detalladas y mapas. Un mapa de localización general y un mapa de Puerto Rico aparecen después de la tabla de contenido. El mapa de Puerto Rico muestra los nombres de los municipios y sus límites, los nombres y límites de áreas estadísticas metropolitanas estándares (AEME) y del estadística consolidada estándar (AECE), los nombres y la localización de todos los lugares con una población de 25,000 habitantes o más y de las ciudades centrales de AEME con menos de 25,000 habitantes. Luego siguen dos páginas de gráficas que preceden a las 17 tablas detalladas. Cada tabla se identifica por un número de tabla y un título. El encabezamiento de la columna matriz al lado izquierdo debajo del título define los tipos de áreas geográficas para las cuales se presentan los datos en la tabla en particular y se considera parte del título de la tabla.

La guía para localizar las tablas, al dorso de la portada, lista las características cubiertas en este informe y muestra las tablas en las cuales aparecen los varios tipos de estadísticas. La cantidad de detalle presentado en este informe es generalmente mayor para lugares grandes que para lugares pequeños. La cantidad mayor de detalle es presentada para Puerto Rico y su parte urbana y rural, y para AECE, AEME, áreas urbanizadas, lugares con una población de 10,000 o más, y para municipios. Información un poco menos detallada es presentada para lugares de 2,500 a 10,000 habitantes y para las porciones rurales de municipios. La menor cantidad de detalle es presentada para lugares de 1,000 a 2,500 habitantes y para subdivisiones de muni-

Las tablas están seguidas por una sección de mapas que incluye:

- Un "Índice para Localización de Municipios" que presenta las coordenadas de referencia y los números de las secciones del mapa para cada municipio en el mapa de subdivisiones del municipio, la leyenda para dicho mapa y un mapa de Puerto Rico delineando el área geográfica cubierta por cada sección del mapa de subdivisiónes del municipio.
- Un mapa de subdivisiones del municipio, frecuentemente cubriendo varias páginas, que presenta los nombres y límites de municipios, sus subdivisiones y lugares, según reconocidos por el Negociado del Censo en las tablas contenidas en la publicación.
- Un mapa para cada área urbanizada

que presenta los nombres y límites de Puerto Rico, los municipios, subdivisiones de municipios y lugares, al igual que la extensión del territorio que se define como "urbanizado."

Últimos en el informe se encuentran los apéndices. El Apéndice A define las diferentes clasificaciones del área (e.g., residencia urbana y rural, lugares designados por el censo y áreas urbanizadas). El Apéndice B provee definiciones y explicaciones de los temas cubiertos en este informe. El Apéndice C explica brevemente las reglas de residencia que se utilizaron al contar la población y describe los procedimientos de recopilación y elaboración de datos. El Apéndice D presenta información sobre las fuentes de error en los datos, los procedimientos de revisión, y una descripción de las tablas de asignación A-1 y A-2. El Apéndice E presenta un facsímil de las páginas del cuestionario del censo de 1980 mostrando las preguntas de 100-por ciento de población y vivienda y un facsímil de las instrucciones al respondedor.

CIFRAS DERIVADAS (Promedios, Medianas y Por Cientos)

Este informe muestra promedios, medianas y por cientos, así como ciertas tasas y proporciones. La mediana—la cual es una clase de promedio—es el valor central de una distribución; i.e., la mediana divide la distribución en dos partes iguales: la mitad de los casos cae bajo la mediana y la otra mitad de los casos excede la mediana. Los por cientos y otras medidas derivadas que redondean a menos de 0.1 no se presentan pero se indican como cero (i.e., "—").

Las medianas para distribuciones de cuartos están redondeadas a la decena más cercana, para personas a la centena más cercana, para valor a la centena de dólar más cercana, y para alquiler contractual al dólar más cercano. Al computar medianas para cuartos y personas por unidad de vivienda, se usa el número completo como el punto medio del intervalo de

modo que, por ejemplo, la categoría "3 cuartos" se trata como un intervalo que se extiende desde 2.5 hasta 3.5 cuartos. Al computar la mediana para alquiler, se excluyeron las unidades que se informaron como "no pagan alquiler en efectivo." La mediana está computada basándose en la distribución según fue tabulada, la cual es en ocasiones más detallada que la distribución que se muestra en este informe. Cuando la mediana cae en la categoría terminal inferior de una distribución con intervalos de clase abiertos, el método de presentación es mostrar el valor inicial de la próxima categoría seguido por un signo negativo; así, por ejemplo, si la mediana cae en la categoría "Menos de \$2.000." se muestra como "\$2,000-." Cuando la mediana cae en la categoría terminal superior de una distribución con intervalos de clase abiertos. se muestra el valor inicial de la categoría terminal seguido de un signo positivo; así, por ejemplo, si la mediana cae en la categoría \$100,000 o más," se muestra como "\$100,000+."

SÍMBOLOS Y ABREVIATURAS GEOGRÁFICAS

Los siguientes símbolos y abreviaturas geográficas se utilizaron en las tablas:

- Una raya o guión "-" representa cero, o un por ciento que redondea a menos de 0.1
- Tres puntos "..." significa que no es aplicable o que los datos se han suprimido para evitar revelar información sobre unidades de vivienda individuales. (Para más información sobre la divulgación de datos, véase la sección que aparece a continuación sobre "Supresión de Datos para Mantener la Confidencialidad.")
- (NA) significa que no está disponible.
- Un signo negativo que precede una cifra indica una disminución.
- AECE significa área estadística consolidada estándar.
- AEME significa área estadística metropolitana estándar.

SUPRESIÓN DE DATOS PARA MANTENER LA CONFIDENCIALIDAD

Para mantener la confidencialidad prometida a los informantes y requerida por ley, el Negociado del Censo toma precauciones para asegurarse de que los datos publicados no revelan información sobre individuos y sobre unidades de vivienda en particular. Para lograr esto, el Negociado suprime datos para algunas características que están basados en un pequeño número de personas y/o unidades de vivienda en el área geográfica. Bajo ciertas condiciones ambas supresiones, primarias y complementarias, deben llevarse a cabo.

Las reglas generales para la supresión primaria son las siguientes: las cifras sobre población total nunca se suprimen; otras características para personas se publican únicamente si existen 15 personas o más en el área geográfica; cifras de unidades de vivienda total, unidades de vivienda desocupadas, unidades de vivienda para uso todo el año, y de unidades de vivienda ocupadas nunca se suprimen; características de unidades de vivienda para uso todo el año, que no son clasificadas por estado de tenencia, se publican únicamente cuando existen cinco o más unidades de vivienda para uso todo el año en el área geográfica; características de familias, de hogares o de unidades de vivienda ocupadas se publican únicamente si existen por lo menos cinco unidades de vivienda ocupadas dentro del área geográfica; y distribuciones de dátos para propietarios o inquilinos se publican únicamente donde el número de propietarios o de inquilinos es por lo menos cinco. Estos criterios de supresión primaria son aplicados independientemente el uno del otro.

En algunos casos, se aplica supresión complementaria para prevenir la derivación de datos suprimidos primariamente mediante resta. Por ejemplo, datos sobre unidades de vivienda presentados por tenencia podrían requerir supresión complementaria cuando el número de unidades de vivienda ocupadas por propietarios u ocupadas por inquilinos es menor de cinco.

PUERTO RICO

Los 78 municipios son las partes componentes de Puerto Rico.

MUNICIPIOS

En Puerto Rico, las divisiones primarias se conocen como municipios. Cada municipio tiene límites establecidos legalmente y constituye una entidad gubernamental. Dos municipios han sido creados desde 1970, Canóvanas y Florida, los cuales fueron separados de los Municipios de Loíza y Barceloneta respectivamente. Cada municipio, con la excepción de Florida, contiene una ciudad o pueblo donde se encuentra ubicada la sede de

gobierno. El municipio de Florida tiene su sede de gobierno ubicada en el barrio Florida Adentro.

SUBDIVISIONES DE MUNICIPIOS

En Puerto Rico los municipos se subdividen de la manera siquiente:

- 1. Ciudades, pueblos y barrios. Los barrios son las subdivisiones primarias de los municipios. Los barrios tienen límites establecidos legalmente, pero no constituyen una entidad gubernamental. "Ciudad" o "pueblo" es el nombre dado al barrio o grupo de barrios que identifican el centro de gobierno del municipio. Las ciudades, pueblos y barrios sirven esencialmente como distritos electorales v como la base para la distribución proporcional en la legislatura del Estado Libre Asociado. Muchas subdivisiones de municipios han sido redefinidas desde el 1970 para refleiar sus límites legales, los cuales en muchos casos no fueron utilizados en los informes del censo de 1970. En Puerto Rico hay dos ciudades. Ponce y San Juan, que consisten de grupos de barrios.
- 2. Subbarrios. Los subbarrios sirven como entidades electorales y representativas, subdividiendo aun más las ciudades, algunos pueblos y en tres municipios—Ponce, San Juan y Salinas—barrios que no son ni la ciudad ni el pueblo. Existen subbarrios en 23 municipios.

LUGARES

Los informes censales de Puerto Rico reconocen un tipo de lugar—los lugares designados por el censo. Estos lugares son identificados como zonas urbanas y aldeas. Los informes del censo de los Estados Unidos reconocen, además de los lugares designados por el censo, los lugares incorporados.

Los lugares incorporados reconocidos en los informes del censo de los Estados Unidos son aquellos que se han incorporado bajo las leyes de sus respectivos estados como ciudades, condados, pueblos y aldeas. En Puerto Rico no hay lugares incorporados. Aunque las ciudades y pueblos en Puerto Rico tienen límites establecidos legalmente, no son incorporados en el mismo sentido que en los Estados Unidos, y para propósitos censales se reconocen como subdivisiones de municipios y no como lugares.

Lugares Designados por el Censo

Al igual que en los censos de 1950, 1960 y 1970, el Negociado del Censo, en cooperación con el gobierno de Puerto
Rico, delineó límites para áreas densamente pobladas sin límites corporativos. En 1980, se les reconoce a tales
lugares como lugares designados por el
censo (LDC). En Puerto Rico, los LDC
se identificaron como zonas urbanas y
aldeas. Para ser reconocidas en el censo
de 1980, las aldeas deben tener una
población mínima de 1,000 habitantes;
sin embargo, las zonas urbanas se reconocen no importa el tamaño de la
población.

Los límites de los lugares designados por el censo varían de acuerdo a los cambios en los patrones de desarrollo residencial; un lugar que tiene el mismo nombre que en censos anteriores no necesariamente tiene los mismos límites. Los contornos de los límites de LDC se presentan en el mapa de subdivisiones del municipio. Mapas detallados están disponibles para la compra en el Negociado del Censo.

Zonas Urbanas—Las zonas urbanas se componen de la sede del gobierno municipal y el área desarrollada adyacente. Las zonas urbanas son delineadas por la Junta de Planificación de Puerto Rico bajo la autorización de la Ley de Planificación de Puerto Rico de 1975. Se publican las cifras para todas las zonas urbanas no importa el número de habitantes. En 1970, las zonas urbanas fueron erróneamente llamadas ciudades y pueblos, y los límites legales de la ciudad/pueblo no fueron reconocidos. Las zonas urbanas no habían sido reconocidas antes del censo de 1970.

Aldeas – Las aldeas son núcleos densamente poblados sin límites legales definidos. Los límites de las aldeas fueron delineados por la Junta de Planificación de Puerto Rico siguiendo los procedimientos establecidos por el Negociado del Censo.

RESIDENCIA URBANA Y RURAL

Según definida por el censo de 1980, la vivienda urbana se compone de todas las unidades de vivienda localizadas en áreas urbanizadas v en lugares de 2.500 habitantes o más, fuera de áreas urbanizadas. Más especificamente, la vivienda urbana consiste de todas las unidades de vivienda localizadas en (1) lugares de 2,500 habitantes o más identificados como zonas urbanas y aldeas y (2) otros territorios incluidos en áreas urbanizadas. Las unidades de vivienda que no se clasifican como urbanas constituyen la vivienda rural. Información sobre el desarrollo histórico de la definición de residencia urbana-rural aparece en el informe Censo de Población de 1980, Características de la Población, Número de Habitantes, PC80-1-A.

ÁREAS URBANIZADAS

Definición

El objetivo principal del Negociado del Censo al delinear áreas urbanizadas es el de proveer una separación más adecuada entre la población y la vivienda urbana y rural en la vecindad de las grandes ciudades. Un área urbanizada consiste de una ciudad o ciudades centrales y el territorio densamente poblado que la rodea ("franja urbana").

Los siguientes criterios se utilizan al determinar la eligibilidad y definición de

áreas urbanizadas en 1980:1

Un área urbanizada consiste de un lugar y el área adyacente densamente poblada que le rodea y que juntos tienen una población mínima de 50,000 habitantes.² El área adyacente densamente poblada consiste de:

- 1. Lugares contiguos que tienen:
 - a. Una población de 2,500 habitantes o más; o,
 - b. Una población menor de 2,500 pero con una densidad poblacional de 1,000 personas por milla cuadrada, un área densamente poblada que contiene un mínimo de 50 por ciento de la población, o una agrupación de por lo menos 100 unidades de vivienda.
- Un área contigua que se conecta por carretera y tiene una densidad poblacional de por lo menos 1,000 personas por milla cuadrada.³
- Otra área contigua con una densidad de menos de 1,000 personas por milla cuadrada siempre y cuando ésta:
 - a. Elimine un enclave de menos de 5 millas cuadradas que esté rodeado de un área desarrollada.
 - b. Cierre una indentación en los límites de un área densamente poblada que no mida más de una milla a lo ancho en la parte abierta y abarque una superficie no mayor de 5 millas cuadradas.
 - c. Conecte un área exterior de una densidad que califique, siempre que tal área esté:
 - Conectada por carretera a, y no quede a más de 1½ millas de, el cuerpo principal del área urbanizada.
 - (2) Separada del cuerpo principal del área urbanizada por agua u otra área que no es desarrollable, esté conectada por carretera al cuerpo principal del área

urbanizada, y no quede a más: de 5 millas del cuerpo principal del área urbanizada.

4. Grandes concentraciones de áreas urbanas no residenciales (tales como parques industriales, áreas de oficinas y aeropuertos principales) que tienen por lo menos una cuarta parte de sus limites contiguos a un área urbanizada.

Un mapa de cada área urbanizada en l Puerto Rico se encuentra después de las : tablas en este informe.

Títulos de Áreas Urbanizadas

- Los títulos de áreas urbanizadas que existían antes del Censo de Población y Vivienda de 1980 se han mantenido sin cambio excepto en casos donde ha habido consolidaciones y en aquellas áreas que llenan los requisitos de la sección 4 de los criterios para la asignación del título.
- Los títulos de áreas urbanizadas nuevas que califican como resultado del censo de 1980 se determinan de la manera siguiente:
 - a. El nombre del lugar de mayor población en el área urbanizada siempre se incluye en el título.
 - b. Los nombres de hasta dos lugares adicionales se pueden incluir en el título, determinando la eligibilidad de la manera siguiente:
 - (1) Aquellos con una población de por lo menos 250,000 habitantes
 - (2) Aquellos con una población de 15,000 a 250,000 habitantes, siempre que éstos sean por lo menos una tercera parte de la población del lugar más grande en el área urbanizada.
- Los títulos de áreas que incluyen los nombres de más de un lugar comienzan con el nombre del lugar más grande seguido por los demás en orden descendente de su población.
- 4. Se pueden utilizar títulos regionales para identificar áreas urbanizadas con una población de más de un millón, en cuyo caso sólo la ciudad más grande del área urbanizada se incluye en el título.

¹Todas las referencias a cifras de población y densidades poblacionales se relacionan a datos del censo de 1980.

²Para que un área urbanizada sea reconocida, tiene que incluir una población de por lo menos 25,000 habitantes que no resida en una base

³Cualquier área de terreno urbano de extenso uso no residencial, tal como aeropuertos, fábricas, parques, campos de golf y cementerios, se excluye al computar la densidad poblacional.

Ciudades Centrales de Áreas Urbanizadas

Las ciudades centrales de áreas urbanizadas son aquellas mencionadas en los títulos excepto donde se utilizan títulos regionales. En tales casos, las ciudades centrales son aquellas que han calificado bajo las secciones 1 y 2 de los criterios para la asignación del título.

ÁREAS ESTADÍSTICAS METROPOLITANAS ESTÁNDARES

Definición

El concepto general de un área metropolitana es el de un núcleo grande de población, conjuntamente con comunidades advacentes que tienen un alto grado de integración económica v social con ése núcleo. La clasificación como área estadística metropolitana estándar (AEME) es un patrón estadístico desarrollado para uso por agencias Federales en la producción, análisis y publicación de datos sobre áreas metropolitanas. Las AEME son designadas y definidas por la Oficina de Administración y Presupuesto, siguiendo una serie de normas oficiales desarrolladas y publicadas por el Comité Federal Interagencial sobre Áreas Estadísticas Metropolitanas Estándares.

Cada AEME en Puerto Rico tiene uno o más municipios centrales que contienen la concentración de población principal del área: un área urbanizada con una población de por lo menos 50,000 habitantes. Un AEME también puede incluir municipios cercanos que mantienen relaciones sociales y económicas estrechas con los municipios centrales. El municipio cercano deberá tener un nivel específico de tráfico de pasajeros con los municipios centrales y deberá, además, satisfacer ciertas normas con respecto a carácter metropolitano, tales como densidad poblacional, población urbana v crecimiento poblacional.

Las unidades de vivienda localizadas en las AEME pueden ser denominadas como vivienda metropolitana. La vivienda localizada en AEME se subdivide en "dentro de la ciudad central (o ciudades)" y "fuera de la ciudad central (o ciudades)." Las unidades de vivienda localizadas fuera

de las AEME constituyen la vivienda no metropolitana.

Títulos de AEME

La mayoría de las AEME tienen por lo menos una ciudad central. Los títulos de las AEME pueden incluir los nombres de hasta tres ciudades. Para el censo de 1980, las ciudades centrales de las AEME son aquellas mencionadas en los títulos de las AEME. En Puerto Rico, donde no existen lugares incorporados reconocidos por el Negociado del Censo, las zonas urbanas y las aldeas pueden ser reconocidas como ciudades centrales.

En este informe, se presentan ciudades centrales de AEME en las tablas designadas "... para Áreas y Lugares" sin importar la población. Por lo tanto, una ciudad central con una población entre 10,000 y 50,000 habitantes no aparecerá en las tablas para lugares de 10,000 a 50,000 habitantes.

Nuevas Normas para AEME

El 3 de enero de 1980 se publicaron nuevas normas en el Registro Federal para designar v definir áreas estadísticas metropolitanas estándares. Las AEME reconocidas para el censo de 1980 comprenden: (1) todas las áreas, incluyendo cuatro en Puerto Rico, según definidas al primero de enero de 1980, excepto por un área en los Estados Unidos que se definió provisionalmente durante la década del 70 a base de estimaciones de la población pero cuya calificación no fue confirmada por las cifras del censo de 1980; v (2) 36 áreas nuevas. incluyendo una en Puerto Rico, definidas a base de las cifras del censo de 1980 y las nuevas normas que se publicaron el 3 de enero de 1980.

Las nuevas normas no se aplicarán a áreas existentes al primero de enero de 1980, hasta después que los datos sobre los patrones de tráfico de pasajeros estén disponibles de las tabulaciones del censo de 1980. En ese momento se revisarán los límites, definiciones y títulos para todas las AEME.

Para ayudar a los usuarios que quieren familiarizarse con las normas para la creación de las AEME y cómo estas se aplican, hay documentos disponibles en la Oficina de Administración y Presupuesto, Washington, D.C. 20503.

ÁREAS ESTADÍSTICAS CONSOLIDADAS ESTÁNDARES

En algunas partes del país, el desarrollo metropolitano ha progresado al punto de que AEME adyacentes están interrelacionadas social y económicamente. Estas áreas se designan como áreas estadísticas consolidadas estándares (AECE) por la Oficina de Administración y Presupuesto, y se definen utilizando normas incluidas como parte de las nuevas normas para AEME descritas anteriormente.

RELACIÓN ENTRE ÁREAS URBANIZADAS Y ÁREAS METROPOLITANAS

Aunque en concepto, el área urbanizada y el área metropolitana están estrechamente relacionadas, existen diferencias importantes. El área urbanizada tiene una extensión de territorio más limitado. El área urbanizada consiste del territorio de desarrollo físico continuo alrededor de cada ciudad central y por lo tanto, generalmente corresponde al centro de densidad poblacional alta v mediana en el corazón del área metropolitana. En concepto, un área metropolitana es siempre más grande que su área urbanizada central, aun cuando el área metropolitana es definida en términos de pequeñas manzanas de edificios porque ésta incluye zonas de desarrollo urbano y suburbano discontinuo más allá de la periferia del área de desarrollo continuo. El área metropolitana también puede incluir territorio rural, cuyos residentes viajan a trabajar en la ciudad o sus inmediaciones, mientras que el área urbanizada no incluye tal territorio. En la práctica, porque las definiciones de AEME usan los municipios como sus partes componentes, con frecuencia se incluyen extensiones considerables de territorio rural con poco tráfico de pasajeros.

A veces una porción del área urbanizada se extiende más allá del límite del AEME, dentro de un municipio nometropolitano u otra AEME. Sin embargo, tales porciones usualmente son muy pequeñas en área y población.

Las nuevas normas para AEME disponen que cada AEME se asocie con un área urbanizada. Sin embargo, lo opuesto no es cierto, hay algunas áreas urbanizadas que no se encuentran en ningún AEME. Esta situación ocurre cuando un área urbanizada no califica como AEME con una población de por lo menos 100,000 habitantes y el área urbanizada no tiene una ciudad con una población de por lo menos 50,000 habitantes.

Además, algunas AEME contienen más de un área urbanizada. Esto ocurre cuando:

- Dos o más concentraciones urbanas no muy distantes entre sí y de un tamaño general parecido tienen áreas urbanizadas separadas pero califican como una sola AEME. Frecuentemente, el título del AEME incluye el nombre de la ciudad más grande de cada una de las áreas urbanizadas que la componen.
- Un AEME muy grande incluye dentro de sus límites un área urbanizada

grande y una o más áreas urbanizadas individuales más pequeñas.

CAMBIOS EN LOS LÍMITES

Los limites de algunas de las áreas presentadas en este informe han cambiado desde un censo anterior, para el cual se presentan cifras, y el primero de enero de 1980. Los datos históricos presentados aquí para municipios, lugares y áreas urbanizadas no se han ajustado para tales cambios y por lo tanto, reflejan el número de personas en viviendas ocupadas en las áreas según definidas en cada censo. En 1970. los límites legales de las ciudades/pueblos en muchos municipios se pasaron por alto para así incluir las áreas desarrolladas de barrios contiguos. Estas áreas fueron incorrectamente llamadas ciudades v pueblos en los informes de 1970. Estos lugares son equivalentes a aquellos identificados como zonas urbanas en el censo de 1980. Los datos históricos para las AEME y AECE han sido ajustados para reflejar las áreas según definidas para el censo de 1980. Información sobre cambios en los límites de municipios y subdivisiones de municipios se presenta en la tabla 4 del informe. Censo de Población de 1980, Características de la Población, Número de Habitantes, PC80-1-A. Véase el informe Número de Habitantes de cada censo, para información sobre cambios en los límites anteriores al 1970.

DIMENSIÓN DEL ÁREA

Las cifras sobre dimensión del área para municipios están disponibles en la tabla 2 del informe PC80-1-A para Puerto Rico.

GENERAL

El censo de Puerto Rico de 1980 se llevó a cabo a través de un procedimiento que combinaba la autoenumeración y la entrevista personal. El determinante principal para las respuestas fue, por lo tanto, el cuestionario y sus instrucciones acompañantes. Mas aún, a los enumeradores se les instruyó a que leveran las preguntas directamente del cuestionario durante la entrevista personal. Las definiciones y explicaciones que aparecen a continuación para cada tema, fueron tomadas en su mayoría de varios documentos técnicos y procesales usados en la recopilación de los datos. Estos materiales ayudaron a los entrevistadores del censo a entender más cabalmente el objetivo de cada pregunta y a resolver problemas y casos poco usuales en armonía con tales objetivos. También se incluye cierta información explicativa para ayudar al usuario en la utilización apropiada de las estadísticas.

Facsímiles de las páginas del cuestionario, conteniendo las preguntas de 100-por ciento de población y vivienda, usadas para producir los datos en este informe y de la hoja de instrucciones al respondedor están reproducidas en el apéndice E.

ALOJAMIENTOS

Todos los alojamientos son clasificados en el censo como unidades de vivienda o como alojamientos de grupo. Usualmente los alojamientos están en estructuras destinadas para uso residencial (e.g., una casa de una familia, apartamiento, hotel o motel, casa de huéspedes, casa móvil o remolque). Sin embargo, los alojamientos podrían encontrarse también en estructuras destinadas para uso no residencial (e.g., los cuartos en un almacén donde vive el celador) así como en botes, casetas de campaña, camiones cubiertos, etc.

Unidades de Vivienda-Una unidad de vivienda es una casa, un apartamiento, un grupo de cuartos o un solo cuarto ocupado como un alojamiento separado, o si desocupado, destinado para ocuparse como un alojamiento separado. Alojamientos separados son aquellos en los que los ocupantes viven y comen separadamente de otras personas en el edificio y los cuales tienen acceso directo desde el exterior del edificio o a través de un pasillo común. Los ocupantes pueden ser una sola familia, una persona viviendo sola, dos o más familias viviendo juntas o cualquier otro grupo de personas emparentadas o no emparentadas, que comparten su vivir (excepto según se describe en la sección próxima sobre Alojamientos de Grupo). Para unidades desocupadas los criterios de separación y de acceso directo son aplicados a los ocupantes futuros, siempre y cuando sea posible. Si dicha información no puede ser obtenida, los criterios son aplicados a los ocupantes anteriores. Ambas unidades de vivienda, ocupadas y desocupadas, son incluidas en el inventario de viviendas excepto que los botes, las casetas de campaña, camiones cubiertos, cuevas y demás son incluidos en el inventario de vivienda solamente si están ocupados como la residencia habitual de alguien. Las casas móviles desocupadas son incluidas siempre y cuando sean destinadas para ocupación en el lugar donde están localizadas. Las casas móviles desocupadas en solares del distribuidor o en almacenaje son excluidas del inventario de viviendas.

Comparabilidad con los Datos del Censo de 1970 Sobre Unidades de Vivienda—A

pesar de que los datos de 1980 son generalmente comparables con los datos de 1970, ciertos cambios fueron introducidos para 1980. La parte de la definición de unidad de vivienda de 1970 que requería de una unidad el tener: (1) acceso directo o (2) facilidades de cocina para uso exclusivo fue modificada. Para 1980 la alternativa de facilidades de cocina para uso exclusivo fue eliminada, y sólo acceso directo fue requerido de todas las unidades de vivienda. En 1970, las casas móviles desocupadas no fueron contadas como unidades de vivienda. Para 1980, éstas fueron incluidas en el inventario de viviendas siempre que fueran destinadas para ocupación en el lugar donde se encontraban.

Alojamientos de Grupo-Alojamiento de grupo es cualquier alojamiento que no está clasificado como una unidad de vivienda. Existen dos tipos de alojamientos de grupo: (1) alojamientos de grupo institucionales y (2) alojamientos de grupo no institucionales. Alojamientos de grupo institucionales son alojamientos ocupados por una o más personas bajo tratamiento o custodia, tales como niños en un orfanato, personas en sanatorios privados, y prisioneros en una penitenciaria. Alojamientos de grupo no institucionales incluven aloiamientos tales como residencias de colegios privados, casas de fraternidades y sororidades, dormitorios de enfermeras y casas de huéspedes. Además, los alojamientos de grupo no institucionales incluyen cualquier alojamiento (diferente de aquellos clasificados como alojamientos de grupo institucionales) que está ocupado por 9 personas o más no emparentadas con el jefe de hogar, o por 10 personas o más no emparentadas. Información sobre las características de vivienda de alojamientos de grupo no fue recopilada en el censo.

Comparabilidad con los Datos del Censo de 1970 Sobre Alojamientos de Grupo—En el 1970, una unidad se clasificaba como alojamiento de grupo si el jefe de hogar compartía la unidad con 5 personas o más no emparentadas a él o ella o si 6 personas o más, no emparentadas estaban viviendo juntas en la unidad. Para 1980, este requisito fue elevado a 9 personas o más no emparentadas con el residente que es dueño o alquila el alojamiento o 10 personas o más no emparentadas entre sí. La persona de referencia en el hogar en 1970 era el

Jefe de hogar (el esposo en familias de parejas casadas). Para 1980, esto fue cambiado al miembro del hogar (o uno de los miembros) a cuyo nombre estaba registrada o estaba alquilada la unidad de vivienda.

Reglas para Hoteles, Casas de Huéspedes, Etc.—Cuartos o apartamientos ocupados en hoteles, moteles o lugares similares se clasifican como unidades de vivienda únicamente cuando son ocupados por huéspedes permanentes; i.e., personas quienes consideran el hotel como su lugar habitual de residencia o quienes no tienen lugar habitual de residencia en ninguna otra parte. Cuartos o apartamientos desocupados son clasificados como unidades de vivienda únicamente en aquellos hoteles en los cuales el 75 por ciento o más de sus facilidades están ocupadas por residentes permanentes.

Si cualquiera de los ocupantes en una casa de huéspedes o de pupilos vive y come separadamente de las demás personas en el edificio y tiene acceso directo a éste, sus habitaciones son clasificadas como una vivienda separada. Las habitaciones restantes se combinan. Si las habitaciones combinadas contienen ocho huéspedes o menos no emparentados con el jefe de hogar, éstas se clasifican como una unidad de vivienda. Si las habitaciones combinadas contienen nueve huéspedes o más no emparentados con el jefe de hogar, o persona a cargo, éstas se clasifican como alojamientos de grupo.

Alojamientos del Personal Directivo—Los alojamientos ocupados por el personal directivo, dentro de cualquier alojamiento de grupo, son unidades de vivienda separadas si satisfacen los criterios de separación y acceso directo; de lo contrario, se consideran como alojamientos de grupo.

Unidades de Vivienda para Uso Todo el Año—Los datos sobre las características de la vivienda en los informes del censo de 1980 se limitan a las unidades para uso todo el año; es decir, todas las unidades ocupadas más las unidades desocupadas disponibles para uso todo el año. Las unidades de vivienda desocupadas destinadas para ocupación estacional se excluyen por la dificultad en obtener información confiable sobre sus características. Sin embargo, recuentos del

inventario total de viviendas se presentan para cada área presentada en este informe.

CARACTERÍSTICAS DE LA OCUPACIÓN Y DE LA VACANCIA

Unidades de Vivienda Ocupadas-Una unidad de vivienda se clasifica como ocupada si ésta es la residencia habitual de la persona o grupo de personas viviendo en ella al momento de la enumeración: o si los ocupantes sólo estaban ausentes temporalmente; e.g., de vacaciones. Si todas las personas quedándose en la unidad de vivienda tienen su residencia habitual en otro lugar, la unidad se clasifica como desocupada. Un hogar incluye todas las personas que ocupan una unidad de vivienda como su lugar habitual de residencia. En este informe. por definición, el recuento de unidades de vivienda ocupadas es el mismo que el recuento de hogares en los informes del Censo de Población de 1980.

Personas en Unidades de Vivienda Ocupadas—"Personas en unidades de vivienda ocupadas" es la población total menos aquélla viviendo en alojamientos de grupo. "Personas por unidad de vivienda ocupada" se computa dividiendo la población viviendo en unidades de vivienda por el número de unidades de vivienda ocupadas. Los datos también se muestran separadamente para la población en unidades ocupadas por propietarios y en unidades ocupadas por inquilinos.

Unidades de Vivienda Desocupadas—Una unidad de vivienda es clasificada como desocupada si nadie vive en ella al momento de la enumeración, a menos que sus ocupantes sólo estén ausentes temporalmente. Unidades ocupadas temporalmente al momento de la enumeración por personas que tienen su residencia habitual en otro lugar también se clasifican como desocupadas.

Las unidades nuevas que aún no han sido ocupadas se clasifican como desocupadas si la construcción ha llegado al punto donde todas las ventanas y puertas exteriores están instaladas y los pisos están listos para usarse. Las unidades desocupadas son excluidas si están expuestas a los elementos, (i.e., el techo, las paredes, las ventanas y/o las puertas no protejen el interior de lluvia, sol, frío, etc.) o si existe evidencia positiva (tal como un

letrero en la casa o en el bloque) de que la unidad va a ser demolida o está clausurada. También se excluyen locales usados en su totalidad para propósitos no residenciales, tales como una tienda o una oficina, o locales utilizados para el almacenaje de provisiones o inventarios de negocios, maquinaria o productos agrícolas.

Tipo de Unidad Desocupada-Las unidades de vivienda desocupadas son clasificadas en este informe como "estacional" o como "para uso todo el año." Las unidades "estacionales" son destinadas para ocupación únicamente durante ciertas estaciones del año. Se incluyen unidades destinadas para uso recreativo, tales como cabañas de playa, cabañas de veraneo, etc., así como las viviendas que se le ofrecen a los veraneantes para la práctica de deportes de verano. Las unidades de vivienda desocupadas "para uso todo el año," están disponibles o destinadas para ocupación en cualquier momento del año. Una unidad en un área recreativa que está ocupada habitualmente durante todo el año se considera como "para uso todo el año." Una vivienda que sólo se usa ocasionalmente a través del año también se considera como para uso todo el año.

Clasificación de la Vacancia—Los datos sobre "clasificación de la vacancia" fueron tabulados de las respuestas a la partida C del cuestionario (véase la partida C en el Apéndice E, "Facsímiles de las Instrucciones al Repondedor y de las Páginas del Cuestionario"). Las unidades desocupadas para uso todo el año, son subdivididas de acuerdo a su estado de vacancia como sigue:

Para venta únicamente. Unidades desocupadas para uso todo el año, que están disponsibles para "venta únicamente," incluyendo las unidades individuales en proyectos de cooperativas y de condominios si éstas están disponibles "para venta únicamente."

Para alquiler. Unidades desocupadas para uso todo el año, dispuestas "para alquiler," y unidades desocupadas disponibles para alquiler o para venta.

Alquilada o vendida, pendiente de ocupación. Si se pagó alguna cantidad de dinero por el alquiler de la vivienda o se llegó a un acuerdo al respecto

pero el inquilino todavía no se ha mudado a la fecha de la enumeración; o si la vivienda se vendió recientemente, pero el nuevo dueño no se ha mudado aún, la unidad de vivienda desocupada para uso todo el año, se clasifica como "alquilada o vendida, pendiente de ocupación."

Retenida para uso ocasional. Esta categoría consiste de unidades desocupadas para uso todo el año, que se retienen para usarse los fines de semana u otro "uso ocasional" durante el año. Las unidades en condominio cuya propiedad o tiempo de ocupación se comparten también se clasifican como "retenidas para uso ocasional." Viviendas reservadas por sus dueños como vivienda secundaria usualmente caen en esta categoría, a pesar de que algunas viviendas secundarias podrían ser clasificadas como "estacionales."

Otra vacante. Si una unidad desocupada para uso todo el año, no cae en ninguna de las categorías especificadas anteriormente, se clasifica como "otra vacante." Por ejemplo, esta categoría incluye unidades retenidas desocupadas hasta que se resuelva un caso de herencia, unidades reservadas para ser ocupadas por un guardián o conserje, y unidades retenidas por razones personales del dueño.

Estado de Clausura (Entabladas)—Las unidades clausuradas son aquellas estructuras desocupadas en las que las ventanas y las puertas están cubiertas por madera, metal o materiales similares para protejer el interior, y para prevenir la entrada al edificio. Una estructura de una sola unidad o una unidad o unidades en una estructura de muchas unidades podrían estar clausuradas en esta forma. En este informe, los datos para unidades entabladas sólo se muestran en la categoría "otra vacante."

Tasa de Vacancia de Unidades de Vivienda Propias—La tasa de vacancia de las unidades de vivienda propias es la relación en términos de por ciento entre las unidades para uso todo el año, desocupadas para venta, y el inventario total de unidades propias. Esta tasa se computa dividiendo el número de unidades para uso todo el año, desocupadas para venta, entre la suma de las unidades ocupadas por propietarios y las unidades para uso

todo el año, desocupadas para venta únicamente. Se excluyen las unidades desocupadas para uso "estacional" o retenidas fuera del mercado.

Tasa de Vacancia de Unidades de Vivienda para Alquiler-La tasa de vacancia de unidades de vivenda para alquiler es la relación en términos de por ciento de las unidades para uso todo el año, desocupadas, para alquiler, al inventario total de viviendas para alquiler. Esta tasa se computa dividiendo el número de unidades para uso todo el año, desocupadas, para alquiler, entre la suma de las unidades ocupadas por inquilinos y las unidades para uso todo el año, desocupadas, para alquiler. Se excluyen las unidades desocupadas para uso "estacional" o retenidas fuera mercado.

Duración de la Vacancia-Las estadísticas sobre "duración de la vacancia" se refieren al tiempo transcurrido (en meses) entre la fecha en que los últimos ocupantes se mudaron de la unidad y la fecha de la enumeración (véase la partida D en el Apéndice E, "Facsímiles de las Instrucciones al Respondedor y de las Páginas del Cuestionario"). Los datos, por lo tanto, no proveen una medida directa del tiempo total en que la unidad permaneció desocupada. Para unidades recién construidas que nunca han sido ocupadas, la duración de la vacancia se cuenta a partir de la fecha en que la construcción fue terminada. Para unidades recientemente convertidas o combinadas, el tiempo se reporta a partir de la fecha en que se completó la conversión o combinación.

Tenencia—Una unidad de vivienda es clasificada como "ocupada por propietario" si el dueño o condueño vive en la unidad, aun cuando ésta está hipotecada o no se ha pagado en su totalidad. Todas las demás unidades ocupadas son clasificadas como "ocupadas por inquilinos," incluyendo unidades alquiladas por pago en efectivo y aquellas ocupadas sin pago de renta en efectivo (véase la pregunta H7 en el Apéndice E, "Facsímiles de las Instrucciones al Respondedor y de las Páginas del Cuestionario").

Unidades de Vivienda en Condominio— Condominio implica posesión que permite a una persona poseer un apartamiento o casa en un complejo de unidades similares y mantener propiedad común o conjunta en áreas comunes, pasillos, entradas, elevadores, etc. El dueño posee una escritura de la unidad individual y, muy probablemente, una hipoteca sobre la unidad. Una unidad de vivienda en condominio no necesita estar ocupada por el propietario para ser contada como tal.

Comparabilidad con los Datos del Censo de 1970 Sobre Unidades de Vivienda en Condominio—En 1970, unidades de vivienda en cooperativas y en condominio ocupadas por propietarios fueron identificadas juntas. El censo de 1980 identifica únicamente unidades en condominio. La pregunta de 1980 provee datos sobre unidades de vivienda en condominio desocupadas y ocupadas por inquilinos, no sólo sobre unidades de vivienda en condominio ocupadas por propietarios como en el 1970.

CARACTERÍSTICAS DE LA UTILIZACIÓN

Personas—Se cuentan todas las personas ocupando la unidad de vivienda. Estas incluyen no solo a los ocupantes emparentados con el jefe del hogar, sino que también incluyen inquilinos, pupilos, huéspedes, compañeros de cuarto, menores bajo tutela, hijos de crianza y empleados residentes quienes comparten el alojamiento del jefe de hogar. Los datos sobre "personas en la unidad" muestran el número de unidades de vivienda ocupadas por el número especificado de personas.

Cuartos-Las estadísticas sobre "cuartos" se muestran en términos del número de unidades de vivienda con un número especificado de cuartos (véase la pregunta H6 en el Apéndice E, "Facsímiles de las Instrucciones al Respondedor y de las Páginas del Cuestionario"). La intención de esta pregunta es contar el número de cuartos completos utilizados para propósitos de vivienda. Para cada unidad éstos incluyen salas, comedores, cocinas, dormitorios, cuartos de recreación terminados y cuartos de huéspedes. Se excluyen cuartos de baño, balcones, pasillos, sótanos o cualquier otro espacio no terminado utilizado para almacén. Un cuarto dividido parcialmente es un cuarto separado únicamente si tiene una división que va desde el piso hasta el techo.

Personas por Cuarto—"Personas por cuarto" es una medida derivada obtenida dividiendo el número de personas en cada unidad de vivienda ocupada por el número de cuartos en la unidad. Por lo tanto, las cifras mostradas se refieren al número de unidades de vivienda ocupadas conteniendo la razón especificada de personas por cuarto.

CARACTERÍSTICAS ESTRUCTURALES

Facilidades Sanitarias—La categoría, "Todas las facilidades sanitarias para uso exclusivo," consiste de unidades que tienen agua por tuberías (lo mismo caliente y fría que fría únicamente), un inodoro, y una bañera o ducha en el edificio para uso exclusivo de los ocupantes de la unidad. "Sin alguna o todas las facilidades sanitarias para uso exclusivo" incluye condiciones en que (1) todas las tres facilidades sanitarias especificadas están presentes en el edificio, pero son utilizadas también por otro hogar; (2) algunas pero no todas las facilidades están presentes; o (3) ninguna de las tres facilidades sanitarias especificadas está presente (véase la pregunta H5 en el Apéndice E. "Facsímiles de las Instrucciones al Respondedor y de las Páginas del Cuestionario").

Comparabilidad con los Datos del Censo de 1970 Sobre Facilidades Sanitarias—En ambos censos 1970 y 1980, se hicieron preguntas separadas en Puerto Rico, sobre la presencia de agua por tuberías caliente y fría, una bañera o ducha, y un inodoro. Para 1980, al igual que en 1970, en las tabulaciones sobre facilidades sanitarias completas se requirió que las facilidades estuvieran en el edificio. Además, para 1980, si la unidad no tenía un inodoro, se le pidió ai respondedor que identificara sus facilidades sanitarias de la manera siguiente: letrina, otra o ninguna. En 1970, a sólo una muestra de las viviendas se le pidió que proveyera tal información.

Las tabulaciones en este informe presentan datos sobre unidades de vivienda conteniendo facilidades sanitarias completas y sobre unidades sin alguna o todas las facilidades sanitarias. Los datos también se presentan separadamente para cada una de las facilidades sanitarias: agua por tuberías en el edificio, inodoro, y bañera o ducha.

Unidades en la Estructura-Una estructura es un edificio separado que o tiene espacios abiertos por todos lados o está separado de otras estructuras por paredes divisorias que se extienden desde el piso hasta el techo. En la determinación del número de unidades en una estructura, todas las unidades, tanto las ocupadas como las desocupadas fueron contadas. Las estadísticas se presentan para el número de unidades de vivienda en estructuras de tipo y tamaño especificado, no para el número de edificios residenciales. Las tabulaciones que presentan separadamente la categoría, "Casa móvil o remolque, etc.," incluyen unidades clasificadas como botes, casetas de campaña. camiones cubiertos, etc.

CARACTERÍSTICAS FINANCIERAS

Valor—Valor es la estimación que hace el respondedor sobre la cantidad por la que se vendería la propiedad (la casa y el solar) o unidad en condominio, si estuviera en venta. Para unidades desocupadas, el valor es el precio solicitado por la propiedad (véase la pregunta H11 en el Apéndice E, "Facsímiles de las Instrucciones al Respondedor y de las Páginas del Cuestionario").

El valor y el precio solicitado son tabulados separadamente para ciertos tipos de unidades de vivienda. Las estadísticas de valor se muestran para unidades de vivienda "especificadas, ocupadas por propietarios" y para unidades de vivienda "especificadas, desocupadas. para la venta únicamente." Estas unidades de vivienda "especificadas" incluyen únicamente casas de una familia localizadas en solares de menos de 3 cuerdas (una cuerda es aproximadamente 0.97 acres) sin un establecimiento comercial, o una oficina médica en la propiedad. Las casas móviles, remolques, botes, casetas de campaña o camiones cubiertos ocupados como residencia habitual, y unidades no en condominio ocupadas por propietarios, en edificios multifamiliares son también excluidas de las tabulaciones de valor.

Para mantener comparabilidad con censos anteriores, el valor se muestra separadamente para unidades en condominio. En este informe, las estadísticas sobre valor se presentan para unidades en condominio ocupadas por propietarios pero no se muestran para unidades en

condominio "desocupadas, para la venta únicamente."

Alquiler Contractual—Alquiler contractual es el alquiler mensual que se ha convenido pagar o que se ha estipulado en un contrato, sin considerar muebles y equipo, agua, gas, electricidad u otros servicios que puedan estar incluidos. Para unidades desocupadas, este es el alquiler solicitado

al momento de la enumeración (véase la pregunta H12 en el Apéndice E, "Facsímiles de las Instrucciones al Respondedor y de las Páginas del Cuestionario.")

Las estadísticas sobre alquiler son tabuladas para unidades de vivienda "especificadas, ocupadas por inquilinos" y para unidades de vivienda "especificadas, desocupadas, para alquiler" lo que incluye unidades para alquiler excepto casas de una familia en solares de 3 cuerdas o más. Se le pidió a los respondedores que reportaran únicamente el alquiler de la unidad de vivienda enumerada y que excluyeran cualquier alquiler pagado por unidades adicionales o por locales de negocio. Unidades de alquiler ocupadas sin pago en efectivo se muestran separadamente como "sin pago en efectivo" en las tabulaciones de alquiler.

Apéndice C.—Procedimientos Generales para la Enumeración y Elaboración de Datos

LUGAR HABITUAL DE RESIDENCIA

De acuerdo con los procedimientos censales que se originaron con el primer censo de los Estados Unidos en 1790, cada persona enumerada en el censo de 1980 se contó como habitante de su "lugar habitual de residencia," que generalmente significa aquel lugar en el cual la persona vive y duerme la mayor parte del tiempo. Este lugar no es necesariamente el mismo que la residencia legal de la persona ni su residencia para efectos electorales. Sin embargo, en la gran mayoría de los casos, el uso de estas diferentes bases de clasificación producirá substancialmente las mismas estadísticas, aunque podrían haber diferencias apreciables para varias áreas.

La implementación de esta práctica ha resultado en el establecimiento de reglas de residencia para ciertas categorías de personas cuyo lugar habitual de residencia no es inmediatamente aparente. Además, esta práctica significa que las personas no siempre fueron contadas como residentes del lugar en el cual se estaban quedando el Día del Censo (1ro de abril). Las personas sin un lugar habitual de residencia, sin embargo, se contaron en el lugar donde se encontraban. Información detallada sobre reglas de residencia se presenta en el informe Censo de Población de 1980, Características de la Población, Número de Habitantes, PC80-1-A.

PROCEDIMENTOS PARA LA RECOPILACIÓN DE LOS DATOS

El Censo de Puerto Rico de 1980 fue conducido a través de una combinación de autoenumeración y entrevista personal. En áreas con servicio de entrega postal, un cuestionario anticipado del censo que

contenía información explicativa y un número limitado de preguntas, fue entregado por el cartero a cada hogar en su ruta, varios días antes del Día del Censo, el primero de abril de 1980. Se le pidió al jefe de hogar que llenara el cuestionario y se lo entregara al enumerador(a) cuando éste visitara el hogar. Cuestionarios incompletos, inconsistentes o en blanco se completaron mediante entrevista durante la visita del enumerador. En áreas sin servicio de entrega postal, todas las unidades de vivienda fueron enumeradas mediante entrevista personal: aun cuando algunos cuestionarios por anticipado fueron dejados por el cartero en aquellos lugares donde las personas recibían su correspondencia. Las unidades desocupadas fueron enumeradas mediante visita personal y mediante observación.

Cada hogar en Puerto Rico fue enumerado usando una de dos versiones del cuestionario del censo: un cuestionario de forma corta conteniendo un número limitado de preguntas básicas sobre población y vivienda o un cuestionario de forma larga que contenía dichas preguntas básicas más un número adicional de preguntas. Se usó un procedimiento de muestreo para determinar aquellos hogares que iban a contestar el cuestionario de forma larga. Durante la visita del enumerador, a uno de cada seis hogares (alrededor de un 17%) se le pidió que contestara la forma larga o el cuestionario de la muestra. Los cuestionarios del censo estaban disponibles en español y en inglés.

Se usaron cuestionarios especiales para enumerar personas en alojamientos de grupo tales como: colegios, universidades, hospitales, prisiones, instalaciones militares y barcos. Estos cuestionarios contenían las mismas preguntas de población que aparecieron tanto en la forma larga como en la corta, pero no incluían ninguna pregunta sobre vivienda.

PROCEDIMIENTOS PARA LA ELABORACIÓN DE LOS DATOS

Los cuestionarios del censo de Puerto Rico de 1980 se elaboraron de manera similar a la usada en el censo de 1970. Estos fueron diseñados para ser elaborados electrónicamente por FOSDIC (Film Optical Sensing Device for Input to Computer). Para casi todas las preguntas en el cuestionario. la información suministrada por el respondedor u obtenida por el enumerador, fue anotada marcando las respuestas en posiciones predesignadas que serían "leidas" por FOSDIC de una copia del cuestionario en "microfilm" y transferidas a cintas para computadoras sin intervención alguna de elaboración manual. De las cintas para computadoras se excluvó la información sobre nombres y direcciones de individuos.

En la elaboración de los datos de 100por ciento, todas las formas cortas, y las páginas 2 y 3 de la forma larga (que contienen las mismas preguntas que la forma corta), fueron microfilmadas, "leídas" por FOSDIC, y transferidas a cintas de computadoras para tabulación.

La cinta conteniendo la información del cuestionario fue elaborada en las computadoras del Negociado del Censo, a través de un número de pasos de revisión y tabulación. Entre los productos de esta operación se encuentran cintas para computadoras de las cuales se prepararon las tablas en este informe (y muchas otras en las publicaciones del censo de 1980) en un equipo de composición fototipográfica en la Oficina de Imprenta del Gobierno.

Una descripción más detallada sobre la recopilación de los datos y el procedimiento para la elaboración de los mismos puede obtenerse de: "1980 Census of Population and Housing, *Users' Guide*, PHC80-R1.

Apéndice D. — Exactitud de los Datos

FUENTES DE ERROR	D-1
REVISIÓN DE DATOS	
INACEPTABLES	D-1
TABLAS DE ASIGNACIÓN	D-2

FUENTES DE ERROR

Debido a que las cifras de población y de vivienda de 1980 presentadas en este informe se tabularon de las anotaciones referentes a personas y a unidades de vivienda en todos los cuestionarios, estas cifras no están sujetas a errores de muestreo. En cualquier operación estadística de gran escala tal como un censo decenal, ocurren errores humanos y mecánicos. Estos errores se conocen comúnmente como errores aienos al muestreo. Tales errores incluyen el no haber enumerado cada unidad de vivienda o persona en la población, el no obtener toda la información necesaria del respondedor, el obtener información errónea o inconsistente, y el anotar la información incorrectamente. También pueden ocurrir errores durante la revisión de campo del trabajo de los enumeradores, la elaboración de los cuestionarios del censo en la oficina, o durante la elaboración electrónica de los cuestionarios.

Como parte de un intento por reducir los diferentes tipos de errores ajenos al muestreo, en el censo de 1980, se introdujeron una serie de técnicas basadas en las experiencias de censos anteriores y en los resultados de pruebas llevadas a cabo antes del censo. Estas medidas de control de calidad y revisión se utilizaron a través de las fases de recopilación y elaboración de datos para minimizar la subcobertura de la población y de las unidades de vivienda y para mantener los errores a un mínimo.

REVISIÓN DE DATOS INACEPTABLES

El objetivo de la operación de elaboración

es producir un conjunto de estadísticas que describan la población y las unidades de vivienda de Puerto Rico tan exacta y claramente como sea posible. Para conseguir este objetivo, ciertas respuestas inaceptables pasaron a través de un proceso de revisión.

En el campo, los cuestionarios fueron revisados por un oficinista del censo o por el enumerador para corregir omisiones y ciertas inconsistencias y, cuando necesario, se hizo una nueva visita para obtener información omitida. Además, una revisión similar del cuestionario se hizo en la oficina central de elaboración. Como regla, sin embargo, la revisión se llevo a cabo manualmente únicamente cuando ésta no pudo hacerse eficientemente a máquina.

Como uno de los primeros pasos en la revisión, la configuración de marcas en las columnas del cuestionario fue escudriñada electrónicamente para determinar si éste contenía información para una unidad de vivienda o meras marcas espúreas. Si cualquier característica para una unidad de vivienda faltaba aún cuando el cuestionario llego o la oficina central de elaboración, éstas fueron suplidas por asignación. Asignaciones de códigos aceptables en lugar de anotaciones inaceptables, fueron necesarias más frecuentemente cuando faltaba la anotación para una partida dada o cuando la información reportada para una unidad de vivienda sobre esta partida era inconsistente con otra información para la vivienda. Como en censos anteriores, el procedimiento general para cambiar anotaciones inaceptables fue el de asignar una anotación para una vivienda que era consistente con anotaciones para otra vivienda con características similares. Por ejemplo, si la unidad fue reportada como alquilada pero la cantidad de alguiler fue omitida. la computadora automáticamente asignó el alquiler que fue reportado para la unidad anterior ocupada por inquilinos. Se cree que la asignación de códigos aceptables en lugar de anotaciones en blanco o inaceptables aumenta la utilidad de los datos.

El proceso de revisión incluye también otro tipo de corrección: a saber, la asignación de un grupo completo de características para una persona o unidad de vivienda. La asignación de un grupo completo de características de vivienda ocurre cuando no hay información de vivienda disponible. Si se determina que la unidad de vivienda estaba ocupada, las características de la vivienda son asignadas de la unidad ocupada previamente elaborada. Si la unidad de vivienda está desocupada, las características sobre la vivienda son asignadas de la unidad desocupada previamente elaborada. Cuando hubo indicación de que una unidad de vivienda estaba ocupada pero el cuestionario no contenía información para todas o la mayoría de la gente aunque se sabía que habían personas presentes, se seleccionó como substituto, un hogar previamente elaborado, y el grupo completo de características para cada persona substituta fue duplicado. Esta duplicación cae dentro de dos categorías: (1) "personas o unidades de vivienda substituidas debido a falta de entrevista;" e.g., cuando una unidad fue indicada como ocupada pero las características de los ocupantes o de la unidad de vivienda no fueron anotadas en el cuestionario y (2) "personas o unidades de vivienda substituidas debido a fallos mecánicos;" e.g., cuando la página del cuestionario no fue microfilmada correctamente.

Se establecieron tolerancias específicas para el número de asignaciones por computadora y de substituciones que serían permitidas. Si el número de correcciones excedía las tolerancias, el cuestionario donde ocurrieron los errores fue revisado en la oficina. Si se encontró que los errores resultaron de cuestionarios dañados, de microfilmación incorrecta, de lectura defectuosa por FOSDIC de cuestionarios en buen estado, o de otro tipo de falla mecánica, los cuestionarios fueron reelaborados.

ABLAS DE ASIGNACIÓN

La extensión de las asignaciones en el proceso de revisión y su efecto en cada uno de los temas, se presenta en las tablas A-1, A-2, y A-2a que siguen a la tabla 17. En estas tablas, unidades de vivienda con una o más asignaciones se presentan como porcentajes de unidades de vivienda para uso todo el año o unidades de vivienda ocupadas. En ciertos casos, estas tablas presentan procentajes de un grupo especificado de unidades. Los porcentajes no se presentan si la partida no se publica para las áreas especificadas.

Apéndice E.—Facsímiles de las Instrucciones al Respondedor y de las Páginas del Cuestionario

INSTRUCCIONES PARA LAS PREGUNTAS 1 A LA 5

- 1. Anote en la pregunta 1 (en la página 1), los nombres de todas las personas que usualmente viven aquí. Luego pase a las páginas 2 y 3 donde hay columnas suficientes para anotar hasta siete personas. En la primera columna escriba en letra de molde el nombre del miembro del hogar que es dueño de o a cuyo nombre se alquila esta vivienda. Si ninguno de los miembros del hogar es dueño de o alquila esta vivienda, anote en la primera columna el nombre de cualquier miembro adulto del hogar que no sea un huésped, un pupilo o un empleado remunerado. En las columnas que siguen, anote en letra de molde los nombres de los demás miembros del hogar, si los hay, usando la pregunta 1 como referencia para asegurarse de que nadie falte.
- 2. Llene el círculo que indique el parentesco de cada persona con la persona anotada en la columna 1.

Un hijastro o hijo legalmente adoptado de la persona en la columna 1 deberá ser identificado como Hijo/hija. Hijos de crianza o menores en tutela que viven en el hogar deberán ser identificados como Pupilo, huésped.

- Asegúrese de llenar el círculo que indique el sexo de cada persona.
- 4. Escriba la edad cumplida en el espacio que se provee ("0" en el caso de niños menores de un año de edad). También anote el mes y año de nacimiento y llene los círculos apropiados. Para una ilustración sobre cómo hacer las anotaciones en la pregunta 4, vea el ejemplo. Si desconoce la edad o el mes o el año de nacimiento, de su mejor estimación.
- Las parejas que viven juntas deben informar el estado matrimonial o civil que consideran es el más apropiado.

Si la persona vive en una unión marital sin tener un contrato matrimonial civil o religioso, marque Unión consensual.

Si el único matrimonio de una persona fue anulado, llene el círculo que indica Nunca se ha casado.

INSTRUCCIONES PARA LAS PREGUNTAS H4 A LA H6

- H4. Llene el segundo círculo únicamente si usted tiene que pasar a través de la vivienda de otras personas para llegar a la suya.
- H5a. Considere que tiene agua caliente aún cuando solamente la tenga parte del tiempo.

El agua caliente que se obtiene mediante el uso de un aparato eléctrico que se instala cerca de la salida del agua en un fregadero, ducha, etc., no se considera como agua caliente por tuberías.

Las facilidades sanitarias deben estar localizadas en el mismo edificio en el que está localizada su vivienda para ser consideradas como disponibles para su unidad o *Dentro del edificio*. Las facilidades sanitarias pueden estar localizadas dentro de su propia unidad, en el pasillo o en un cuarto usado por varias unidades en el edificio.

- H5b-c.Llene el círculo que indica Sí, pero usada también por otro hogar si alguna otra persona que vive en el mismo edificio, pero que no es miembro de su hogar, también usa las facilidades. También llene este círculo si los futuros ocupantes de una vivienda que está actualmente desocupada habrán de usar las facilidades en su vivienda.
- H6. Cuente únicamente los cuartos que se usan para propósitos de alojamiento, tales como salas, comedores, cocinas, dormitorios, cuartos de recreación, etc. No cuente los cuartos de baño, las facilidades de cocina que ocupan una sección dentro de otro cuarto, cuartos para lavado, planchado y otros servicios o cualquier otro espacio que se usa para almacenaje.

INSTRUCCIONES PARA LAS PREGUNTAS H7 A LA H12

H7. Llene el círculo que indica Propia o la está comprando si usted ya es dueño de la vivienda o la tiene hipotecada. También llene el círculo que corresponde a Propia o la está comprando si es dueño de la vivienda pero alquila el solar.

Llene el círculo que indica Alquilada por pago en efectivo si se paga dinero por el alquiler. El alquiler puede ser pagado por personas que no son miembros del hogar.

Ocupada gratis incluye, por ejemplo, una rectoría, viviendas para militares, una casa o apartamento cedido por el dueño a otra persona para que lo habite sin el pago de alquiler o una casa o apartamento ocupado por un conserje o encargado a cambio de servicios prestados.

- H8. Un condominio es un tipo de vivienda en el cual los apartamentos o casas en una urbanización pertenecen a propietarios individuales, pero las áreas de uso común, tales como vestíbulos (!obbies), pasillos, etc., son propiedad mancomunada o en común. Es muy probable que la persona que posee un condominio tenga una hipoteca sobre la unidad particular.
- H9. Llene un círculo únicamente.

Cuente todas las viviendas ocupadas y desocupadas en la casa o edificio, pero no los establecimientos comerciales o espacios para oficinas.

Separada significa que la casa tiene espacios abiertos en los cuatro lados o que está unida únicamente a un cobertizo o un garaje. Unida significa que la casa está unida a otra casa o edificio por una pared, por lo menos, la cual se extiende desde el piso hasta el techo.

Algunos ejemplos de *casas de una familia, unidas son:* cada una de las casas en una estructura "duplex," cada una de las casas en un "townhouse" o casas en hileras, una casa unida a un edificio no residencial. etc.

Algunos ejemplos de edificios de unidades múltiples son: una casa de apartamentos, una casa de tres pisos en la que cada piso contiene una unidad de vivienda separada, etc.

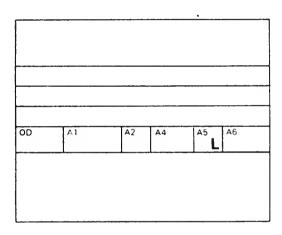

Marque Casa de una familia, separada de cualquiera otra casa cuando a una casa móvil o remolque se le han añadido uno o más cuartos. Un balcón o cobertizo no se considera que es un cuarto.

- H10b. Un establecimiento comercial se reconoce fácilmente desde el exterior; por ejemplo, un colmado o una barbería. Una oficina médica es la oficina de un doctor o dentista a la que regularmente acuden los pacientes. Considere como otro tipo de oficina uno o más cuartos usados para un tipo de oficina que no es una oficina médica.
- H11. Incluya el valor de la casa, del terreno en que está edificada y de cualesquiera otras estructuras en la misma propiedad. Si la casa es propia pero el solar es alquilado, estime el valor combinado de la casa y el terreno. Si es una unidad en un condominio, anote el valor estimado de la unidad en que usted vive más su participación en las áreas de propiedad en común.
- H12. Informe el alquiler que aceptó pagar según contrato, aunque esté retrasado en el pago o sea otra persona la que page el alquiler. Si el alquiler no se paga por mes, calcule la cantidad de alquiler mensual y llene el círculo apropiado en la pregunta H12.

Si paga alquiler:	Multiplique por:
Por día	30
Por semana	4
Cada 2 semana:	s 2

Si paga alquiler:	Divida entre:
4 veces al año	3
2 veces al año Una vez al año	6 12

Censo De Puerto Rico — 1980

Sus respuestas son confidenciales

Por ley (título 13, Código de los Estados Unidos), los empleados del censo están sujetos a multa y/o prisión por cualquier divulgación de sus respuestas. Solamente después de los próximos 72 años es que su información está disponible a otras agencias del gobierno o al público. La misma ley requiere que usted conteste las preguntas según su mejor saber y entender.

NOTA: Las respuestas al cuestionario largo se obtuvieron mediante entrevista personal, por tanto no se imprimieron instrucciones al respondedor ni en inglés ni en español.

Departamento de Comercio de los Estados Unidos Negociado del Censo Forma D-2 PR Un mensaje del Director del Negociado del Censo de los Estados Unidos . . .

Si nuestra Nación ha de hacer frente con éxito a los muchos retos nacionales y locales que afrontamos, debemos, de tiempo en tiempo, hacer un inventario de nosotros mismos como pueblo. Este es el propósito del censo de 1980.

La necesidad esencial de un censo poblacional se reconoció casi 200 años atrás cuando se redactó la Constitución de los Estados Unidos. Según estipula el artículo 1, se han efectuado censos de la población de los Estados Unidos cada 10 años. Dentro del programa del Censo de Población y Vivienda de 1980, y de acuerdo al título 13, Código de los Estados Unidos, el Negociado del Censo de los Estados Unidos está llevando a cabo el censo de la población de Puerto Rico al día 1 de abril de 1980.

La ley bajo la cual se toma el censo protege la confidencialidad de sus respuestas. Por los próximos 72 años, o hasta el 1 de abril del año 2052, únicamente empleados juramentados del censo tienen acceso a los informes individuales y ninguna otra persona puede verlos.

Sus respuestas, al ser combinadas con las de otras personas, proveerán las estadísticas que necesitan los sectores públicos y privados, las escuelas, el comercio y la industria, el Gobierno Federal, el Gobierno de Puerto Rico y el Gobierno Municipal. Estas cifras aumentarán el entendimiento de cómo está cambiando la población y la vivienda puertorriqueña. De esta forma, podemos enfrentar más eficientemente los problemas del presente.

El censo es una actividad de vital importancia para Puerto Rico. Por favor, coopere contestando el cuestionario del censo correcta y completamente. Un enumerador del censo visitará su hogar dentro de varios días para recoger el cuestionario completado. Haga el favor de retener el cuestionario en un sitio seguro y conveniente hasta que el enumerador lo visite.

Gracias por su cooperación.

Formulario Aprobado Núm. de O.M.B. 41-S79051

Página 1

Pregunta 1:

Anote en la Pregunta 1

- Miembros de la familia que viven aquí, incluyendo bebés que aún están en el hospital.
- · Parientes que viven aquí.
- · Pupilos o huéspedes que viven aquí.
- · Sirvientes o empleados que viven aquí.
- · Otras personas que viven aquí.
- Estudiantes universitarios que viven aquí mientras asisten a la universidad, aunque sus padres vivan en otro lugar.
- Personas que regularmente viven aquí pero que están fuera de casa temporalmente (incluyendo niños que están en escuelas de internos de un nivel académico inferior al de universidad).
- Personas que tienen residencia en otro lugar pero que por razones de empleo se quedan aquí la mayor parte de la semana.

No Anote en la Pregunta 1

- Cualquier persona ausente del hogar sirviendo en las Fuerzas Armadas.
- Cualquier estudiante universitario que se hospeda en otro lugar mientras asiste a la universidad.
- Cualquier persona que generalmente se queda en otro lugar la mayor parte de la semana por razón de su empleo.
- Cualquier persona que está recluída en una institución como un asilo de ancianos o un hospital para dementes.
- Cualquier persona que se queda aquí o que está visitando aquí pero que tiene su residencia habitual en otro lugar.

	se quedaba ac ar de residend
 ,	

NOTA

Si todas las personas están aquí temporalmente y tienen residencia habitual en otro lugar, favor de marcar esta casilla

Luego, por favor:

- conteste las preguntas en las páginas 2 à la 5, y
- anote la dirección de la residencia habitual en la pagina 20.

Tenga la bondad de continuar-

1980 Census of Population and Housing

Users' Guide

The Users' Guide, a reference work on the 1980 census, is now available. It consists of:

- Part A. Text—Covers census data subjects; geographic considerations; reports, tapes, maps, and other products; services available to users; and many other topics central to understanding and using 1980 census data.
- Part B. Glossary—Provides detailed definitions of population, housing, geographic, and technical terms associated with the census—especially important for people using 1980 data on tape or microfiche.
- Sources of Assistance—Furnishes addresses and phone numbers of public and private sector organizations offering a variety of products and services, such as tape processing, area profiles, training, and reference assistance.
- Updates—Provide information on new developments relating to the 1980 census. Each update is keyed to the particular point in "Part A. Text" that needs revision.

Part C, a table finder, and Part D, a guide to tape contents, are planned for publication later.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Specify the stock number (S/N) given below and make checks payable to Superintendent of Documents.

Part A. Text (S/N 003-024-03625-8)—\$5.50. Supplement 1 (S/N 003-024-05004-8)—\$6.00 (includes Part B. Glossary, Sources of Assistance, and Updates)
